Each chapter contains a Study Guide section and a Lab Exercises section. Configuration scenarios, concept questions, journal entries, and internet research. You review all the commands covered in the chapter. The book includes all 55 labs from the online course, with an additional 15 labs in which you can apply your knowledge about the technologies and concepts introduced. You will get ample opportunity for hands-on practice in three different types of labs: Curriculum Labs, Comprehensive Labs, and Challenge Labs.

Curriculum Labs are step-by-step exercises designed to introduce you to new concepts. Presenting you with detailed instructions and sometimes additional explanations for completing the lab. These Exercises provide minimal guidance. You are encouraged to complete the Curriculum Labs before moving on to a Comprehensive Lab, and Challenge Labs are unique labs requiring a thorough understanding of the previously learned network concepts.
