Geometry Basics

Point O is the center of the circle in the figure below. What is the value of x ?

☐ 20

☐ 30

☒ 40

☐ 50

Answer: 40

Explanation

Notice that $\angle C$ is an inscribed angle and angle O is a central angle. The central angle theorem states that the measure of a central angle is twice the measure of an inscribed angle that intercepts the same arc.

This means the measure of central angle O is $2x$ because it intercepts the same arc as the x° inscribed angle.

Since
the
central
angle
is
twice
the
inscribed
angle,
we
have
 $2x = 40$.

Dividing both sides by 2, we get $x = 20$.

When parallel lines are cut by a transversal, the following pairs of angles are alternate:

Alternate angles are equal.

Therefore, $x = 20$.

Explanation

Step 1: The first step following an introductory phrase containing an action must be the person or thing that must do that action.

Identify the action in the introductory phrase. Then, choose the answer in which the independent clause begins with the noun that must do the action.

The information that immediately follows the introductory phrase "After collecting the data" must be something that someone does. Because the thing that someone does is the answer, the correct answer must start the independent clause with the noun as the subject.

Therefore, the answer that best completes the sentence states that the scientist predicts when and where all animals will be found, something that he must do in the future.

Answer: A
