**Intelligent Systems and Applications** Kohei Arai, Supriya Kapoor, Rahul Bhatia, 2018-11-08

Gathering the Proceedings of the 2018 Intelligent Systems Conference IntelliSys 2018 this book offers a remarkable collection of chapters covering a wide range of topics in intelligent systems and computing and their real world applications. The Conference attracted a total of 568 submissions from pioneering researchers scientists industrial engineers and students from all around the world. These submissions underwent a double blind peer review process after which 194 including 13 poster papers were selected to be included in these proceedings. As intelligent systems continue to replace and sometimes outperform human intelligence in decision making processes they have made it possible to tackle many problems more effectively. This branching out of computational intelligence in several directions and the use of intelligent systems in everyday applications have created the need for such an international conference which serves as a venue for reporting on cutting edge innovations and developments. This book collects both theory and application based chapters on all aspects of artificial intelligence from classical to intelligent scope. Readers are sure to find the book both interesting and valuable as it presents state of the art intelligent methods and techniques for solving real world problems along with a vision of future research directions.
