*Physics, Volume 1* John D. Cutnell, Kenneth W. Johnson, David Young, Shane Stadler, 2019-07-30 A book to help students understand physics concepts and the role the science plays in their lives. This text has been written to engage students in the subject of physics and promote their understanding of key concepts. The loose leaf volume of Physics 11th Edition Volume 1 is designed to support student success. It opens by discussing kinematics, forces, dynamics, and work and energy. It also provides students with the concepts related to impulse and momentum as well as rotational kinematics and dynamics. An exploration of principles, laws, and theories in the text includes Newton's laws of motion, the ideal gas law, and kinetic theory, and the principle of linear superposition and interference phenomena. Students also learn about electric forces, fields, circuits, and potential energy. The concept of light is explored in relation to reflection, refraction, and the wave nature of light. The text's final chapters look at the nature of the atom, nuclear physics, and nuclear energy. Each chapter of the book comes with a concept summary to reinforce what has been presented. Students also expand learning through solving problems, team problems, and concept calculations.

**Managerial Accounting** Ramji Balakrishnan, Konduru

Sivaramakrishnan, Geoffrey B. Sprinkle, 2008-11-10 Most managerial accounting texts emphasize the mechanics of managerial accounting. While important mechanics are not enough to solve business problems, students need to understand how managerial accounting can improve decision making and when and where a particular tool or technique is appropriate. Balakrishnan's Managerial Accounting 1st edition presents accounting information in the context of business decision making. It combines the traditional topics of managerial accounting with a strategic framework that shows students how to construct decision models and measure information. By linking business decisions with accounting information, students will be motivated to learn and make more informed decisions. Balakrishnan will appeal to courses where there is a true focus on decision making and accounting is placed within a business context.
