

A black and white photograph of two men standing in front of a building. The man on the left is older, with light-colored hair, wearing a white lab coat over a light shirt and dark trousers. He is holding a small object in his right hand. The man on the right is younger, with dark hair, wearing a white lab coat over a light shirt, a dark bow tie, and dark trousers. He is also holding a small object in his right hand. The background shows a building with a door and some architectural details.

Wilhelm Reich Biologist:

Wilhelm Reich, Biologist James E. Strick, 2015-04-06 Refuting allegations of pseudoscience that have long dogged Reich's research the author argues that Reich's lab experiments in the mid 1930s represented the cutting edge of light microscopy and time lapse micro cinematography and deserve to be taken seriously as legitimate scientific contributions Publisher's description

Jewish Exiles' Psychological Interpretations of Nazism Avihu Zakai, 2020-08-31 This book examines works of four German Jewish scholars who in their places of exile sought to probe the pathology of the Nazi mind Wilhelm Reich's *The Mass Psychology of Fascism* 1933 Erich Fromm's *Escape from Freedom* 1941 Siegfried Kracauer's *From Caligari to Hitler A Psychological History of the German Film* 1947 and Erich Neumann's *Depth Psychology and a New Ethic* 1949 While scholars have examined these authors individual legacies no comparative analysis of their shared concerns has yet been undertaken nor have the content and form of their psychological inquiries into Nazism been seriously and systematically analyzed Yet the sense of urgency in their works calls for attention They all took up their pens to counter Nazi barbarism believing like the English jurist and judge Sir William Blackstone who wrote in 1753 *scribere est agere* to write is to act

Nazi Biology and Schools Anne Bäumer-Schleinkofer, 1995 Biology gained enormous prestige in the Third Reich because it was used to give the Nazi world view a pseudoscientific veneer by providing incontrovertible proof of Nazi propaganda and plans The concept of race studies originally developed by the medical profession became the central topic in biology teaching Another aim of biological education was to inculcate the pupils with a love of their own home region and of nature and to train them to take a holistic view of the natural world The two dogmas basic to all curricula and directives on the teaching of Biology were national socialist thought must be biological thought and national socialism is politically applied biology The Nazis were determined to teach Biology in a way that convinced young people emotionally of Nazi policies and laws Teaching methods were altered to match these aims indeed the Nazis pedagogical skill proved equal to their skill as demagogues
