Will Standards Save Public Education:

Will Standards Save Public Education? Deborah Meier, 2000-04-24 Somewhere there is a place of sanity where education is intense and substantive. It's in that place that Deborah Meier has been working all these years. Her voice conveys a life of struggle in the front lines: victories and losses, hopes and disappointments. It's a voice our nation needs to hear. Jonathan Kozol from the Foreword. Acclaimed educator Deborah Meier offers a fresh take on standardized tests. While others have criticized standards and what they measure, Meier rejects the very idea of a centralized authority that dictates how and what teachers teach. Standardization, she argues, prevents citizens including teachers from emerging as thoughtful, responsible adults seriously engaged with shaping their own schools, classrooms, and communities. As a result, young people can't learn from them how to be thoughtful, responsible adults and good citizens. The primary goal of public education in a democracy: The New Democracy Forum is a series of short paperback originals exploring creative solutions to our most urgent national concerns. A civic treasure. A truly good idea carried out with intelligence and panache. Robert Pinsky

Critical Issues in Education Jack L. Nelson, Stuart B. Palonsky, Mary Rose McCarthy, 2017-07-27 Few subjects engender more strongly held beliefs and contrary views than education. The outcomes of debates over education and educational reform impact all citizens. Media coverage of these controversies is sometimes shallow and one-sided, fostering the need to develop critical thinking skills. These skills in turn open opportunities for personal growth, joining the public debate and helping others participate in critical discussions. The authors of *Critical Issues in Education* present two opposing positions for each of sixteen different hot button issues, including multiculturalism, school finance, charter schools, teacher evaluation, cyberbullying, and gender equity. Prospective teachers will find the authors' approach eye-opening and stimulating. Ideally, they will teach these valuable skills to their students, who will prosper academically and personally from understanding and considering diverse viewpoints.

Who Decides Who Becomes a Teacher? Julie Gorlewski, Eve Tuck, 2018-11-09 *Who Decides Who Becomes a Teacher* extends the discussions and critiques of neoliberalism in education by examining the potential for Schools of Teacher Education to contest policies that are typical in K-12 schooling. Drawing on a case study of faculty collaboration, this edited volume reimagines teacher preparation programs as crucial sites of resistance to and refusal of unsound education practices and legislation. This volume also reveals, by example, how education faculty can engage in collaborative scholarly work to investigate the anticipated and unanticipated effects of policy initiatives on teaching and learning.

Elusive Justice Thea Renda Abu El-Haj, 2012-12-06 *Elusive Justice* addresses how educators think about and act upon differences in schools, be they based on race, gender, class, or disability, and how discourse and practice about such differences are intimately bound up with educational justice. Rather than skip over contentious or uncomfortable dialogues about difference, Thea Abu El Haj tackles them head on. Through rich and detailed ethnographic portraits of two schools with a commitment to social justice, she analyzes the ways discourses about difference provide a key site for both producing and

resisting inequalities and examines the dilemmas that emerge from either focusing on or ignoring them In interrogating fundamental assumptions about difference and equity Abu El Haj deftly blends critique with a search for hope and possibility to ultimately argue for ways educators might translate ideals about justice into effective practice Metropedagogy

,2006-01-01 What might it mean to develop a rigorous just and practical urban education Such a question takes on new importance in the middle of the first decade of the twenty first century as urban educators find themselves besieged with test driven standardized curricula promoted in the name of fairness educational excellence and egalitarianism Those who promote these standardized curricula fail to account for the unique situations and needs of particular urban students When an urban curriculum is standardized the students suffering from the effects of poverty racial discrimination and other problems are less likely to receive the specific pedagogical help they need to overcome the effects of such impediments Such students have special needs Teachers need the curricular freedom the professional respect to address these special requirements Metropedagogy constructed as a critical pedagogy for urban education addresses these concerns This book will be very useful as a text in urban education at the graduate and the undergraduate level No Excuses Abigail

Thernstrom, Stephan Thernstrom,2004-10 The racial gap in academic performance between whites and Asians on the one hand and Latinos and blacks on the other hand is America s most urgent educational problem It is also the central civil rights issue of our time say Abigail and Stephan Thernstrom Unequal skills and knowledge are the main sources of ongoing racial inequality and racial inequality is America s great unfinished business A wide and tragic gap in learning is evident in affluent suburbs as well as inner cities But great schools are scattered across the country as described in inspiring detail by the Thernstroms These schools are putting even the most highly disadvantaged children on the American ladder of economic opportunity There are no good excuses for the perpetuation of long standing inequalities the Thernstroms argue eloquently The problem can be solved but conventional strategies will not work Fundamental educational reform is needed Carefully researched accessibly written and powerfully persuasive this book offers both a close analysis of the current landscape and a blueprint for essential and overdue change Education in British India, Prior to 1854, and in 1870-71 Arthur Pearse

Biennial Report of the Superintendent of Public Instruction of the State of Illinois Illinois. Office of the Superintendent of Public Instruction,1915 CTA Journal ,1926 No Child Left Behind and the Transformation of Federal Education Policy, 1965-2005 Patrick J. McGuinn,2006 Education is intimately connected to many of the most important and contentious questions confronting American society from race to jobs to taxes and the competitive pressures of the global economy have only enhanced its significance Elementary and secondary schooling has long been the province of state and local

governments but when George W Bush signed into law the No Child Left Behind Act in 2002 it signaled an unprecedented expansion of the federal role in public education. This book provides the first balanced in depth analysis of how No Child Left Behind NCLB became law. Patrick McGuinn a political scientist with hands on experience in secondary education explains how this happened despite the country's long history of decentralized school governance and the longstanding opposition of both liberals and conservatives to an active reform oriented federal role in schools. His book provides the essential political context for understanding NCLB the controversies surrounding its implementation and forthcoming debates over its reauthorization. How the struggle to define the federal role in school reform took center stage in debates over the appropriate role of the government in promoting opportunity and social welfare. He places the evolution of the federal role in schools within the context of broader institutional ideological and political changes that have swept the nation since the 1965 Elementary and Secondary Education Act chronicles the concerns raised by the 1983 report *A Nation at Risk* and shows how education became a major campaign issue for both parties in the 1990s. McGuinn argues that the emergence of swing issues such as education can facilitate major policy change even as they influence the direction of wider political debates and partisan conflict. McGuinn traces the Republican shift from seeking to eliminate the U.S. Department of Education to embracing federal leadership in school reform then details the negotiations over NCLB the forces that shaped its final provisions and the ways in which the law constitutes a new federal education policy regime against which states have now begun to rebel and that only by understanding the unique dynamics of national education politics will reformers be able to craft a more effective national role in school reform.
