**Sound and Affect** Judith Lochhead, Eduardo Mendieta, Stephen Decatur Smith, 2021-04-23 There is no place on earth that does not echo with the near or distant sounds of human activity More than half of humanity lives in cities meaning the daily soundtrack of our lives is filled with sound whether it be sonorous harmonious melodic syncopated discordant cacophonous or even screeching This new anthology aims to explore how humans are placed in certain affective attitudes and dispositions by the music sounds and noises that envelop us Sound and Affect maps a new territory for inquiry at the intersection of music philosophy affect theory and sound studies The essays in this volume consider objects and experiences marked by the correlation of sound and affect in music and beyond the voice as it speaks stutters cries or sings music whether vocal instrumental or machine made and our sonic environments whether natural or artificial and how they provoke responses in us Far from being stable correlations of sound and affect are influenced and even determined by factors as diverse as race class gender and social and political experience Examining these factors is key to the project which gathers contributions from a cross disciplinary roster of scholars including both established and new voices This agenda setting collection will prove indispensable to anyone interested in innovative approaches to the study of sound and its many intersections with affect and the emotions
