When Should I Start Studying?

It is never too early to start studying for the SAT II Chemistry test. The earlier you begin the more time you will have to sharpen your skills. Do not procrastinate. Cramming is not an effective way to study since it does not allow you the time needed to learn the test material. The sooner you learn the format of the exam the more comfortable you will be when you take the exam.

FORMAT OF THE SAT II CHEMISTRY

The SAT II Chemistry is a one hour exam consisting of 85 multiple choice questions. The first part of the exam consists of classification questions. This question type presents a list of statements or questions that you must match up with a group of choices lettered A through E. Each choice may be used once, more than once, or not at all. The exam then shifts to relationship analysis questions which you will answer in a specially numbered section of your answer sheet. You will have to determine if each of two statements is true or false and if the second statement is a correct explanation of the first. The last section is composed strictly of multiple choice questions with choices lettered A through E.

nervous Do your scratchwork in the margins of the test booklet You will not be given scrap paper during the exam and you may not perform scratchwork on your answer sheet Space is provided in your test booklet to do any necessary work or draw diagrams If you are unsure of an answer guess However if you do guess guess wisely Use the process of elimination by going through each answer to a question and ruling out as many of the answer choices as possible By eliminating three answer choices you give yourself a fifty fifty chance of answering correctly since there will only be two choices left from which to make your guess Mark your answers in the appropriate spaces on the answer sheet Fill in the oval that corresponds to your answer darkly completely and neatly You can change your answer but remember to completely erase your old answer Any stray lines or unnecessary marks may cause the machine to score your answer incorrectly When you have finished working on a section you may want to go back and check to make sure your answers correspond to the correct questions Marking one answer in the wrong space will throw off the rest of your test whether it is graded by machine or by hand You don t have to answer every question You are not penalized if you do not answer every question The only penalty results from answering a question incorrectly Try to use the guessing strategy but if you are truly stumped by a question remember that you do not have to answer it Work quickly and steadily You have a limited amount of time to work on each section so you need to work quickly and steadily Avoid focusing on one problem for too long Before the Test Make sure you know where your test center is well in advance of your test day so you do not get lost on the day of the test On the night before the test gather together the materials you will need the next day Your admission ticket Two forms of identification e g driver s license student identification card or current alien registration card Two No 2 pencils with erasers Directions to the test center A watch if you wish but not one that makes noise as it may disturb other test takers On the day of the test you should wake up early after a good night s rest and have breakfast Dress comfortably so that you are not distracted by being too hot or too cold while taking the test Also plan to arrive at the test center early This will allow you to collect your thoughts and relax before the test and will also spare you the stress of being late If you arrive after the test begins you will not be admitted to the test center and you will not receive a refund During the Test When you arrive at the test center try to find a seat where you feel most comfortable Follow all the rules and instructions given by the test supervisor If you do not you risk being dismissed from the test and having your scores canceled Once all the test materials are passed out the test instructor will give you directions for filling out your answer sheet Fill this sheet out carefully since this information will appear on your score report After the Test When you have completed the SAT II Chemistry Subject Test you may hand in your test materials and leave Then go home and relax When Will I Receive My Score Report and What Will It Look Like You should receive your score report about five weeks after you take the test This report will include your scores percentile ranks and interpretive information *Cracking the SAT II*. A2 Chemistry Rob King, 2003 Student workbooks are designed to support your teaching and help your students' skills development. Each topic covers 5-6 key topics in AS or A2 chemistry and concludes with synoptic questions drawing together different elements of the subject area. Each topic is relevant to the main specifications and comprises 2 pages of background material (e.g. short descriptions and diagrams etc.) giving an overview of the topic and 4-5 pages of related exercises designed to develop and test student skills using the background material and additional resources with space provided for written answers. The workbooks are designed for systematic classroom use to support your own scheme of work so you can either be guided by the structure of the workbook or use it as it corresponds to your own teaching programme. However, it is expected that students will tackle the topics in order as they will need to carry knowledge forward into each new topic area. The questions in the exercises take various forms. They have been written to help students develop skills that will serve them well in their exams rather than to reflect the exam structure or test knowledge recall. Answers to the exercises are provided in an accompanying set of Teachers' Notes. The notes serve as a guidance to teachers on what to expect from student responses so where there is no objectively right answer the notes identify the key points that should appear in the answer. Student workbooks are available only in class sets of 10 priced at 35 per set plus postage and packing. Each set of workbooks includes one FREE copy of the Teachers' Notes.
