This publication Joint Publication JP 3 07 Stability 03 August 2016 provides doctrine for stability mission activities and tasks as part of stabilization efforts across the range of military operations. It sets forth joint doctrine to govern the activities and performance of the Armed Forces of the United States in joint operations and it provides considerations for military interaction with governmental and nongovernmental agencies, multinational forces and other interorganizational partners. It provides military guidance for the exercise of authority by combatant commanders and other joint force commanders, JFCs and prescribes joint doctrine for operations and training. It provides military guidance for use by the Armed Forces in preparing and executing their plans and orders. It is not the intent of this publication to restrict the authority of the JFC from organizing the force and executing the mission in a manner the JFC deems most appropriate to ensure unity of effort in the accomplishment of objectives. The joint doctrine established in this publication applies to the Joint Staff, commanders of combatant commands, subunified commands, joint task forces, subordinate components of these commands, the Services and combat support agencies. It contains five chapters and eight appendixes covering these topics: Chapters 1 Stability Actions; 2 An Integrated Approach to Stabilization; 3 Joint Stability Functions; Security; Foreign Humanitarian Assistance; Economic Stabilization and Infrastructure; Rule of Law; Governance and Participation; 4 Stabilization Planning; 5 Stability Actions in Other Joint Operations; Appendixes A Process for Joint Intelligence Preparation of the Operational Environment; B Assessment Frameworks and the Assessment Process; C Security Sector Reform; D Transitional Governing Authorities; E Legal and Fiscal Considerations; F Key Stabilization Documents; G References; H Administrative Instructions. The guidance in this publication is authoritative as such, this doctrine will be followed except when in the judgment of the commander, exceptional circumstances dictate otherwise. If conflicts arise between the contents of this publication and the contents of Service publications, this publication will take precedence unless the CJCS, normally in coordination with the other members of the Joint Chiefs of Staff, has provided more current and specific guidance. Commanders of forces operating as part of a multinational alliance or coalition military command should follow multinational doctrine and procedures ratified by the United States. For doctrine and procedures not ratified by the US, commanders should evaluate and follow the multinational command's doctrine and procedures where applicable and consistent with US law, regulations and doctrine. **Field Manual FM 3-07 Stability Operations October 2008** United States Army, 2012-05-21. Field Manual FM 3 07 is the Army's keystone doctrinal publication for stability operations. FM 3 07 presents overarching doctrinal guidance and direction for conducting stability operations, setting the foundation for developing other fundamentals and tactics, techniques and procedures detailed in subordinate field manuals. It also provides operational guidance for commanders and trainers at all echelons and forms the foundation for Army Training System curricula. The six chapters that

make up this edition of Stability Operations constitute the Army's approach to the conduct of full spectrum operations in any environment across the spectrum of conflict. This doctrine focuses on achieving unity of effort through a comprehensive approach to stability operations but remains consistent with and supports the execution of a broader whole of government approach as defined by the United States Government (USG). The core of this doctrine includes the following:

- Chapter 1 describes the strategic context that frames the Army's comprehensive approach to stability operations. It includes discussion of the strategic environment, USG strategy and policy, and interagency efforts to define an integrated approach to stability operations that leverages the collective efforts of a wide array of actors toward a commonly understood and recognized end state.
- Chapter 2 links full spectrum operations to broader efforts aiming to achieve stability, emphasizing the simultaneous nature of offensive, defensive, and stability tasks. It describes the phasing paradigm that defines stability operations activities conducted before, during, and after combat operations. Finally, the chapter links the primary stability tasks with broader interagency stability sectors to provide the foundation for civil-military integration at the tactical level.
- Chapter 3 addresses the essential stability tasks that comprise military stability operations. It provides a detailed discussion of each of the five primary stability tasks and describes the subordinate tasks that constitute the range of activities in stability operations. It includes doctrine that describes the role of civil affairs forces in stability operations as the commander's conduit for civil-military integration. Finally, it describes development of mission-essential and directed task list development to support stability operations.
- Chapter 4 discusses the fundamental principles of the detailed component of planning focused on the stability element of full spectrum operations. It builds on the precepts established in FM 3-0 and 5-0, providing a systemic approach to planning and assessing stability operations.
- Chapter 5 addresses transitional military authority and provides doctrine concerning command responsibility, establishment, and organization of military government to support stability operations. It includes principles for establishing judicial structures to enable transitional military authority.
- Chapter 6 provides the doctrinal foundation for security sector reform and introduces security force assistance as the capacity building activity that encompasses organizing, training, equipping, rebuilding, and advising host nation security forces. It also sets disarmament, demobilization, and reintegration as a fundamental element of security sector reform.

Seven appendices complement the body of the manual. Army doctrine is consistent and compatible with joint doctrine. FM 3-07 links stability operations doctrine to joint operations doctrine as expressed in joint doctrinal publications, specifically Joint Publication JP 3-0 and JP 5-0. FM 3-07 expands on the fundamental principles of operations expressed in FM 3-0 and links those principles to a comprehensive approach to stability operations within the framework of full spectrum operations.
