**Machine Intelligence and the Imaginal Realm** Luke Lafitte, 2022-02-01 Explores how we naturally project consciousness onto machines and how this is reflected in human culture science artificial intelligence and literature Demonstrates a direct connection between consciousness and the history of machines in American history Looks at the contributions and influence of Grace Hopper Richard Feynman Philip K Dick Nikola Tesla Thomas Edison Elon Musk David Bohm Norbert Wiener and Steve Jobs as well as the Nag Hammadi Gnostic gospels Humans invented and constructed machines to aid them as far back as the Stone Age As the machines became more complex they became extensions of the body and mind and we naturally began projecting consciousness onto them As Luke Lafitte shows in detail although machines complicate the already complicated issue of identity because they are ours and of us they are part of our spiritual development In this sweeping exploration of the history of the machine as a tool as a transpersonal object to assist human activity and as a transitional artifact between spirits and the humans who interact with them Lafitte examines the role that machines play in the struggle between spiritual man and mechanical man throughout history He interprets the messages archetypes and language of the unconscious in the first popular stories related to mechanical men and he demonstrates a direct connection between consciousness and the history of machines in American history specifically between the inventors

of these machines and the awakening of our imaginations and our powers of manifestation He examines the influence of Philip K Dick Nikola Tesla Thomas Edison Grace Hopper Richard Feynman Elon Musk David Bohm and others and shows how the Nag Hammadi gospels explain how we can take back our myth and spirit from the machine Although the term mechanical man is a catch all phrase Lafitte shows that the term is also a meeting ground where extra dimensional communications between different forms of matter occur Every machine android robot and cyborg arose from consciousness and these mechanical men whether real or fictive offer us an opportunity to free ourselves from enslavement to materialism and awaken our imaginations to create our own realities
