*Spatio-Temporal Stream Reasoning with Adaptive State Stream Generation* Daniel de Leng, 2017-09-08 A lot of today's data is generated incrementally over time by a large variety of producers This data ranges from quantitative sensor observations produced by robot systems to complex unstructured human generated texts on social media With data being so abundant making sense of these streams of data through reasoning is challenging Reasoning over streams is particularly relevant for autonomous robotic systems that operate in a physical environment They commonly observe this environment through incremental observations gradually refining information about their surroundings This makes robust management of streaming data and its refinement an important problem Many contemporary approaches to stream reasoning focus on the issue of querying data streams in order to generate higher level information by relying on well known database approaches Other approaches apply logic based reasoning techniques which rarely consider the provenance of their symbolic interpretations In this thesis we integrate techniques for logic based spatio temporal stream reasoning with the adaptive generation of the state streams needed to do the reasoning over This combination deals with both the challenge of reasoning over streaming data and the problem of robustly managing streaming data and its refinement The main contributions of this thesis are 1 a logic based spatio temporal reasoning technique that combines temporal reasoning with qualitative spatial reasoning 2 an adaptive reconfiguration procedure for generating and maintaining a data stream required to perform spatio temporal stream reasoning over and 3 integration of these two techniques into a stream reasoning framework The proposed spatio temporal stream reasoning technique is able to reason with intertemporal spatial relations by leveraging landmarks Adaptive state stream generation allows the framework to adapt in situations in which the set of available streaming resources changes Management of streaming resources is formalised in the DyKnow model which introduces a configuration life cycle to adaptively generate state streams The DyKnow ROS stream reasoning framework is a concrete realisation of this model that extends the Robot Operating System ROS DyKnow ROS has been deployed on the SoftBank Robotics NAO platform to demonstrate the system's capabilities in the context of a case study on run time adaptive reconfiguration The results show that the proposed system by combining reasoning over and reasoning about streams can robustly perform spatio temporal stream reasoning even when the availability of streaming resources changes

*ECAI 2014* T. Schaub, G. Friedrich, B. O'Sullivan, 2014-08 The role of artificial intelligence AI applications in fields as diverse as medicine economics linguistics logical analysis and industry continues to grow in scope and importance AI has become integral to the effective functioning of much of the technical infrastructure we all now take for granted as part of our daily lives This book presents the papers from the 21st biennial European Conference on Artificial Intelligence ECAI 2014 held in Prague Czech Republic in August 2014 The ECAI conference remains Europe's principal opportunity for researchers and practitioners of Artificial Intelligence to gather and to discuss the latest trends and challenges in all subfields of AI as well as to demonstrate

innovative applications and uses of advanced AI technology Included here are the 158 long papers and 94 short papers selected for presentation at the conference Many of the papers cover the fields of knowledge representation reasoning and logic as well as agent based and multi agent systems machine learning and data mining The proceedings of PAIS 2014 and the PAIS System Demonstrations are also included in this volume which will be of interest to all those wishing to keep abreast of the latest developments in the field of AI Manipulation and Control of Jets in Crossflow Ann R.

Zahmatkesh, Emanuele Della Valle, 2020-01-21 This book examines the problem of relevant query answering over the Web and provides a comprehensive overview of relevant query answering over streaming and distributed data In recent years Web applications that combine highly dynamic data streams with data distributed over the Web to provide relevant answers have attracted increasing attention Answering in a timely fashion i e reactively is one of the most important performance indicators especially when the distributed data is evolving The book proposes a solution that retains a local replica of the distributed data and offers various maintenance policies to refresh the replica over time A limited refresh budget guarantees the reactivity of the system Focusing on stream processing and Semantic Web it appeals to scientists and graduate students in the field **Using Digital Information Services in the Library Workplace** Marie Keen Shaw, 2022-03-21

Library collections have rapidly evolved from a predominance of print books and journals to an ever growing mix of digital and print resources Support staff are expected to know how to help patrons select and use digital information services such as databases digital collections digital archives ebooks streaming video discovery search products the Internet and user focused library interfaces and applications Yet most library support staff LSS has not had training to become proficient in finding using and instructing others in the wide range of digital library services Using Digital Information Services in the Library Workplace An Introduction for Support Staff is an up to date text for professors who teach digital information use and management in library support staff programs and a handbook for those working in libraries who want to keep current as they expand their knowledge and skills This book will help support staff members to Know and use terms and concepts used in digital information services Use digital information services effectively Know how to evaluate and select databases and services Understand issues and trends in the library digital information industry Distinguish key features and enhancements found among vendors and providers of digital libraries digital collections databases and e texts Plan budget and write grants for digital services Understand the complexity and options of licensing and usage agreements for digital information services Know copyright permissions and acceptable use guidelines for digital information services Use government databases and other digitized systems and information sources Locate digital collections of museums universities

Streaming Top Shows Compare: Bestsellers in 2023 The year 2023 has witnessed a remarkable surge in literary brilliance, with numerous compelling novels captivating the hearts of readers worldwide. Lets delve into the realm of popular books, exploring the captivating narratives that have captivated audiences this year. The Must-Read : Colleen Hoover "It Ends with Us" This poignant tale of love, loss, and resilience has gripped readers with its raw and emotional exploration of domestic abuse. Hoover skillfully weaves a story of hope and healing, reminding us that even in the darkest of times, the human spirit can prevail. Uncover the Best : Taylor Jenkins Reids "The Seven Husbands of Evelyn Hugo" This captivating historical fiction novel unravels the life of Evelyn Hugo, a Hollywood icon who defies expectations and societal norms to pursue her dreams. Reids captivating storytelling and compelling characters transport readers to a bygone era, immersing them in a world of glamour, ambition, and self-discovery. Discover the Magic : Delia Owens "Where the Crawdads Sing" This evocative coming-of-age story follows Kya Clark, a young woman who grows up alone in the marshes of North Carolina. Owens weaves a tale of resilience, survival, and the transformative power of nature, entrancing readers with its evocative prose and mesmerizing setting. These popular novels represent just a fraction of the literary treasures that have emerged in 2023. Whether you seek tales of romance, adventure, or personal growth, the world of literature offers an abundance of engaging stories waiting to be discovered. The novel begins with Richard Papen, a bright but troubled young man, arriving at Hampden College. Richard is immediately drawn to the group of students who call themselves the Classics Club. The club is led by Henry Winter, a brilliant and charismatic young man. Henry is obsessed with Greek mythology and philosophy, and he quickly draws Richard into his world. The other members of the Classics Club are equally as fascinating. Bunny Corcoran is a wealthy and spoiled young man who is always looking for a good time. Charles Tavis is a quiet and reserved young man who is deeply in love with Henry. Camilla Macaulay is a beautiful and intelligent young woman who is drawn to the power and danger of the Classics Club. The students are all deeply in love with Morrow, and they are willing to do anything to please him. Morrow is a complex and mysterious figure, and he seems to be manipulating the students for his own purposes. As the students become more involved with Morrow, they begin to commit increasingly dangerous acts. The Secret History is a brilliant and gripping novel that will keep you speculating until the very end. The novel is a warning tale about the dangers of obsession and the power of evil.
