**Concentration Mechanism of Tennis, Golf, Soccer, Baseball, and Skiing** Benjamin J. An,2015-10-27 Benjamin An has discovered the human hand structure which explains why humans are born to hit with an implement and to throw with a trajectory release Hitting and throwing became the most powerful actions in the animal kingdom These actions became the primary tools for humans to survive historically Survival skills become sports actions in the modern civilized world Different sports were invented with modification of the sports actions Dr An has looked into these actions seriously in terms of human natureintellectually biomechanically psychologically physically and mentallyin order to help athletes perform these actions without confusion Many performance problems occur just because these actions are parts of human nature and humans know too much about these actions For example for every action a human knows the results of this action It is very hard for a human to concentrate on the actions only and ignore the results of these actions Thinking about the results has become one of the most serious interferences of that action itself Dr An calls these intellectual interferences Human physical actions are complicated by human mental thoughts and intellectual understandings Sports actions are not just physical actions Sports actions have to be modified if it is necessary and executed with specific mental thoughts in order to fit in any specific sport The author has specifically emphasized on these points in his book

**Anti-bullying and Teasing Book for Preschool Classrooms** Barbara Sprung,Merle Froschl,Blythe Simone Farb

Hinitz,2005 In preschool children encounter their first experiences in forming and joining social groups outside their family It is natural for them to experiment with social interactions while learning about their world In this guide teasing and bullying are addressed as a continuum of intentionally hurtful behavior from making fun of someone to repetitive physical abuse

Creating a caring environment at the beginning of school reduces the need for children to assert themselves through negative behavior such as teasing and bullying With The Anti Bullying and Teasing Book teachers of young children can address this behavior before it develops Special features of this book Information on family school partnerships to engage families in the development of a caring community and to reinforce teachings about empathy and mutual respect Techniques

to teach children how to think about and manage their feelings in a safe and appropriate way Tips for teaching children how to act appropriately as a bystander Children who stand by while a friend is being teased and bullied may be uneasy or even scared that they might be next They feel powerless and learn negative ways to interact with others Teachers have the opportunity to work with bystanders helping them to develop the confidence to stand up for a friend As a result children will

become more able to stand up for themselves and not tolerate teasing and bullying behavior The Anti Bullying and Teasing Book creates an environment that reinforces the positive messages essential to children s sense of safety and well being Some such messages are quoted from Hurt Free Schools by M Christine Mattise If you are hurt on the playground someone

will come to see if you are all right If you are alone you are welcome to join in a game If you are being teased other children will come and tell the teaser to stop If you need help ask an adult When certain social milestones and goals are achieved

children can easily live and work within their world According to the National Association for the Education of Young Children NAEYC Code of Ethical Conduct these goals can be stated in terms of democratic life skills which include the ability to see one s self as a worthy individual and a capable member of the group express strong emotions in non hurting ways solve problems ethically and intelligently be understanding of the feeling and viewpoints of others work cooperatively in groups with acceptance of the human differences among members Teachers have a major influence on how children view themselves within the larger world Children mimic teachers language and interactions By creating a climate of mutual respect teachers can help children learn to develop empathy and treat others fairly and kindly and to stand up for themselves and their friends in safe and developmentally appropriate ways The Anti Bullying and Teasing Book will help teachers create
