The Best Damn Website & ECommerce Marketing Optimization Guide, Period! Stoney Degeyter, 2021-03-18 When it comes to building your online presence there is only one logical place to start your website Your website is you You own it You control it Any presence you build outside of your website isn't yours to keep It may be a reflection of you but when the lights go out on any entity you don't fully own or control a piece of you disappears with it What happens if Facebook cancels your account Or Twitter bans you from their platform Can you get your content back Nope It's gone forever And most of the time without an opportunity to appeal All your hard work building your web presence is wiped out with a snap of the fingers This is why you need to have a website to call home If your web host turns off the lights no problem Take your backups to a new web host and turn them back on again You control your website You and only you decide your fate This means you get to decide how deep how wide and how tall to build your web presence You can't do that with any other online platform Your website is the most critical part of building a successful and effective web presence Build a Winning Web Presence Anyone who has been involved in digital marketing for any length of time can attest that one of the most critical factors of online success is Search Engine Optimization SEO I don't care much for the term SEO because we don't optimize search engines That's what the algorithm tweekers at Google do We optimize websites It just so happens that we optimize them for search engines but we optimize them for our visitors as well I would also argue that optimizing for visitors is far more important than optimizing for Google or Bing That's not to say search engines aren't important They are However search engines are not your customers They don't buy your products or services or click on your ads people do And that makes optimizing your website for people the most important thing you can do The good news is it's not an either/or situation You optimize for both search engines and visitors at the same time Great search engine optimization is just great visitor optimization If you think about it Google's only job is to provide highly relevant links to searchers based on what they are looking for Or to put it more succinctly deliver access to websites that their searchers will love Historically digital marketers have considered top rankings to be the goal of their optimization efforts That's flawed logic Rankings are not the goal they are the reward for a job well

done A top search engine ranking is the trophy for having a website that your audience loves Google doesn't make the winners it simply rewards them Want to create a website that resonates One that searchers and visitors find worthwhile Then this book is for you There's not enough paper in the world to cover every aspect of website optimization Nonetheless the book you are reading is a comprehensive guide to mastering the art of website optimization I have no doubt that you will find it valuable as you push forward in your optimization efforts A Textbook On DIGITAL MARKETING Dr. Tanvi Gupta, Dr.

Smita Mishra, Ms. Khushi Katyal, 2021-02-25 It is a comprehensive textbook on Digital Marketing based on the syllabus of Guru Gobind Singh Indraprastha University Delhi The book covers all the mentioned concepts along with quick revision section after each chapter important questions and unit wise MCQs **The In-Depth Guide to Website On-page**

Optimization Tina Zennand, 2015-02-05 *The most important facts to consider in SEO* Stephanie Kremer, 2018-11-06 Document from the year 2018 in the subject Business economics Business Management Corporate Governance grade 13 Munich University of Applied Sciences language English abstract Only in Germany 23.9 million of the over 14 year old German speaking population used search engines on the internet for their information search daily in 2017 Compared to 21.08 million in 2016 this is a growth of 13.38 percent According to other studies over 85 percent of all internet sessions start with the type in into search engines Therefore Search Engine Optimization SEO offers a huge potential for companies to deliver the right information to interested users when they ask for it actively To succeed against their competitors it is important for companies to appear as high as possible in the search engine results pages SERPs The question about the most important factors to consider in SEO for good ranking positions is always highly discussed in SEO communities because Google reveals as little as possible to avoid manipulation But one thing appears to be clear because of highly developed machine learning algorithms which influence Google's valuation of a website for its ranking classical ranking factors can no longer be used as standard for every search query anymore but relevant content as well as user experience have become important **Optimization of Cooperative Banks' Websites by Application of Persuasive Methods**, 2016-12-28

Bachelor Thesis from the year 2015 in the subject Business economics Offline Marketing and Online Marketing grade 23 University of Applied Sciences Essen language English abstract The increasing requirements for the effectivity of a website and the more and more complex knowledge about human behavioral patterns are challenging the online presence of banks Nowadays a good usability by itself is no significant basis for decision making and the choice of a house bank Good usability is expected Rather the user experience is an essential factor for the success of a website Due to the fact that the human behavior is determined by unconscious patterns it is necessary to take these into consideration when conceptualizing a website in order to develop a user centered target oriented website design By means of persuasive design it is possible to directly address these behavioral patterns Therefore it is reasonable to optimize the user experience by the application of persuasive design methods This shall provide a motivating experience in consideration of decision making tools and motives

of the user In this way it is possible to generate competitive advantage and to gain new customers as well as to boost customer loyalty Here the need for emotionalizing plays a particularly important role But especially in view of banking products it is difficult to create an emotional presentation due to the absence of haptics and because accounts are rather a functional instrument and a means to an end than a product with a high pleasure value Cooperative banks however benefit particularly from this competitive advantage Due to the cooperative idea and their values and principles they are enabled to address potential customers emotionally If values are illustrated the users have the opportunity to identify themselves with those and to align them with their own ideals

9 Key Website Optimization & Seo Strategies to Guarantee Website

Conversion Success Warren Kannuck, 2013-11-21 9 Key Website Optimization SEO Strategies to Guarantee Website Conversion Success Unfortunately 80% or more of the websites built by so called Web Developers are built to fail Why Because they basically don't understand the psychology and structure behind what it takes to generate an amazing conversion rate This effectively means for all the visitors you might get to your site the vast majority of them will end up leaving unsatisfied The actual return you make on your investment will be very low or possibly even nil And what makes things worse is these poor unfortunate website owners are led to believe that the secret to a website's success is all about the traffic to the website and improving their SEO so they head off on a tangent and start spending loads of money on Adwords and other pay per click strategies and then wonder a few months down the track why they've still had no response no sales or inquiries from their website Often times this leads the website owner into believing that websites just don't work and that Adwords and other pay per click methods are a waste of money That belief couldn't be further from the truth How would you like to learn and understand the closely guarded secrets of how some websites seem to convert their visitors into massive inquiries and new customers at the drop of a hat generating hundreds and hundreds of leads on a weekly basis Perhaps you'd also like to know with absolute confidence that the money you do spend generating visitors through Adwords Facebook and other forms of promotional marketing is actually now going to convert into new business inquiries on a regular basis You're about to discover how to fix these problems permanently Here Is A Preview Of What You'll Learn Why your website is not converting people Why your website isn't ranking in Google searches Why you're getting no results from your Adwords campaigns Why people are leaving your website as fast as they arrive Why you're not getting calls or inquiries Why your website is probably damaging your business or brand The two most important key elements to focus on when developing your website The importance of SEO Search Engine Optimization Much much more Order your copy today or Download the Kindle version Check Out What Others Are Saying Simple And effective I think it truly help discover what my website needed And it doesn't beat a round the Bush I enjoyed the straight forward approach Written for an executive who wants to invest wisely in a business tool not in an attempt at award winning designs Worth the 30 minutes it takes to read as it contains years of experience I do not have Enjoyed and appreciated the author's sharing of trade secrets that others try sell
