**Crash Course in Readers' Advisory** Cynthia Orr, 2014-12-05 One of the key services librarians provide is helping readers find books they'll enjoy. This crash course will furnish you with the basic practical information you need to excel at readers advisory RA for adults and teens. The question can you recommend a good book can be one of the most daunting you face notwithstanding the fact that recommender tools are ubiquitous. Often uncertainty arises because although librarians are called on to perform such services daily readers advisory is a skill set in which most have no formal training. This guide will remedy that. It is built around understanding books reading and readers and will quickly show you how to identify reading preferences and advise patrons effectively. You'll learn about multiple RA approaches such as genre appeal features and reading interests and about essential tools that can help with RA. Plus you'll discover tips to help you keep up with this ever changing field. There is no other professional book that covers the full spectrum of skills needed to perform the RA service that is in such great demand in libraries of all kinds. Helping readers find what they want is a sure way to serve patrons and build your library's brand. You will come away from this easy to understand crash course with the solid background you need to do both.

**Literature and Social Media** Bronwen Thomas, 2020-01-31 From Instapoetry to BookTube contemporary literary cultures and practices are increasingly intertwined with social media. In this lively and wide ranging study Bronwen Thomas explores how social media provides new ways of connecting with and rediscovering established literary works and authors while also facilitating the emergence of unique and distinctive forms of creative expression. The book takes a 360 approach to the subject combining analysis of current forms and practices with an examination of how social media fosters ongoing collaborative discourse amongst both informal and formal literary networks and demonstrating how the participatory practices of social media have the potential to radically transform how literature is produced shared and circulated. The first study of its kind to focus specifically on social media. Literature and Social Media provides a timely and engaging account of the state of the art while interrogating the rhetoric that so often accompanies discussion of the new in this context.

**Libraries in the Information Age** Denise K. Fourie, Nancy E. Loe, 2016-05-23 The book Library Media Connection cited

as something all librarians need to have on their shelves is now thoroughly revised for today's 21st century library environment. Covering both technology and library practices, the title has been a go-to text for librarians and library school students since 2002. Since the second edition of this must-have book was published in late 2009, libraries have undergone profound changes primarily linked to advances in technology. We've seen the debut of RDA, the release of new Pew Research library and Internet use data, and the establishment of digital repositories, community MakerSpaces, and community reads programs. Of course, libraries have also been affected by the expanding use of social media. This thoroughly updated title addresses all these changes and more, bringing you up to date on the monumental shifts impacting librarianship. The book is designed to introduce LIS students to the profession, preparing them to enter an exciting and evolving world. It clarifies the changing roles and responsibilities of library professionals, new paradigms for evaluating information and characteristics, and functions of today's library personnel. Among other subjects, chapters cover preparing materials for use, circulation, reference services, ethics in the information age, Internet trends, and job search basics. References, websites, and publications at the end of every chapter point to further resources, and appendices supply information such as policies, the library bill of rights, and the Freedom to Read statement.

[Blogging For Dummies](#) Susannah Gardner, Shane Birley, 2011-02-04. Everybody's doing it. And while that logic never got far with your mother, it's a fine reason to start blogging, especially if you have a business to build or a cause to promote. Well-run blogs do more than offer an outlet for your thoughts. They've actually influenced everything from a company's image to the outcome of a local election. Because the blogosphere is pretty crowded, it's a good idea to find out a bit about the anatomy of a blog: what makes a good one and what it takes to keep one going before you dive right in and start sharing with the world. *Blogging For Dummies* 2nd Edition gives you all the basics so you can get a good start. And if you've been around the blog a few times and want to advance to the next level, *Blogging For Dummies* 2nd Edition even takes a look at podcasting and videoblogging. You'll find out how to make your blog stand out in a crowd, build an audience, and even make it pay. Choose the best software options, boost readership, and handle comments. Generate revenue from your blog with ads and sponsorships. Protect your privacy and your job. Deal with spam and the inappropriate comments from that guy who posts several times a day. Find your niche. Attract and keep readers. Use your blog to promote your business, cause, or organization. Add audio, video, cool widgets, and more. Ready? Get *Blogging for Dummies* and let's get started.

*The Death of the Artist* William Deresiewicz, 2020-07-28. A deeply researched warning about how the digital economy threatens artists' lives and work. the music, writing, and visual art that sustain our souls and societies from an award-winning essayist and critic. There are two stories you hear about earning a living as an artist in the digital age. One comes from Silicon Valley: There's never been a better time to be an artist; it goes. If you've got a laptop, you've got a recording studio. If you've got an iPhone, you've got a movie camera. And if production is cheap, distribution is free; it's called the Internet. Everyone's an artist; just tap your creativity and put your stuff out there. The other comes from artists themselves: Sure, it goes

you can put your stuff out there but who's going to pay you for it Everyone is not an artist Making art takes years of dedication and that requires a means of support If things don't change a lot of art will cease to be sustainable So which account is true Since people are still making a living as artists today how are they managing to do it William Deresiewicz a leading critic of the arts and of contemporary culture set out to answer those questions Based on interviews with artists of all kinds The Death of the Artist argues that we are in the midst of an epochal transformation If artists were artisans in the Renaissance bohemians in the nineteenth century and professionals in the twentieth a new paradigm is emerging in the digital age one that is changing our fundamental ideas about the nature of art and the role of the artist in society
