personal protective equipment PPE and ventilators It has been a real life example of the bullwhip effect where variability at the consumer end of the supply chain results in increased variability as one goes upstream towards distributors manufacturers and suppliers This results in shortages misallocations and increased costs No longer can a manufacturer distributor or retailer of consumer products just fill the pipeline and wait for orders to come in Now they must anticipate various purchases and delivery items while at the same time minimizing costs To do this is no easy task requiring a Lean agile and responsive supply chain Until now there was no existing playbook for organizations to navigate their way through this new world This book describes the impact of omni channel marketing on the supply chain and logistics functions and is intended to help management meet the needs of not only today's ever changing world but to anticipate what may be required in the future to achieve superior customer service profitability and a competitive advantage Business Week, 2010

The Art and Science of Demand and Supply Chain Planning in Today's Complex Global Economy Paul

Myerson, 2023-02-24 The demand and supply chain planning process for manufacturers distributors and retailers has evolved over the years It has gone from a disjointed unconnected slow inaccurate fairly manual set of processes to an integrated timely process enabled by the use and coordination of highly trained people lean agile processes and cutting edge technology To make this set of processes work effectively one has to fully understand and appreciate that there is an art and science aspect to the process which can take years of education and experience to fully understand Essentially this book will offer the reader a chance to fully understand the interconnected set of processes in a best practice application Furthermore examples and cases will be used to illustrate its practical application in today's complex global supply chain In addition readers will understand and be able to apply and articulate the concepts tools and techniques used in the efficient supply of goods and services in today's changing global economy It will help them to learn how businesses through their supply chain work both internally and with their trading partners both upstream and downstream to build strong relationships and integrate demand and supply planning activities across the supply chain to deliver customer value efficiently and effectively They will learn about the tools and technologies enabling integration and the critical drivers and key metrics of supply chain performance
