Writing Philosophy A Students Guide To Writing Philosophy Essays:

Writing Philosophy Lewis Vaughn, 2006 *Writing Philosophy A Student's Guide to Writing Philosophy Essays* is a concise self-guided manual that covers the basics of argumentative essay writing and encourages students to master fundamental skills quickly with minimal instructor input. Opening with an introductory chapter on how to read philosophy, the book then moves into the basics of writing summaries and analyzing arguments. It provides step-by-step instructions for each phase of the writing process, from formulating a thesis to creating an outline to writing a final draft, supplementing this tutorial approach with model essays, outlines, introductions, and conclusions. Skills essential to evaluating arguments, citing sources, avoiding plagiarism, detecting fallacies, and formatting final drafts are dealt with in detail. The final two chapters serve as a reference guide to common mistakes and basic skills in sentence construction, writing style, and word choice. Employing a rulebook format similar to that of the classic *Elements of Style* by Strunk White and Angell, Lewis Vaughn distills helpful writing advice into simple rules that students can easily remember and apply, and that instructors can refer to when reviewing student papers. These rules cover essay organization, sentence structure, documentation styles, plagiarism, grammar, usage, and more. Written in a clear and engaging style and incorporating samples of student writing, *Writing Philosophy* is an indispensable resource for virtually any philosophy course.

Critical Thinking and Language Tim John Moore, 2011-10-13 This book clarifies the idea of critical thinking by investigating the critical practices of academics across a range of disciplines Drawing on key theorists Wittgenstein Geertz Williams Halliday and using a textographic approach the book explores how the concept of critical thinking is understood by academics and also how it is constructed discursively in the texts and practices they employ in their teaching Critical thinking is one of the most widely discussed concepts in debates on university learning For many the idea of teaching students to be critical thinkers characterizes more than anything else the overriding purpose of higher education But whilst there is general agreement about its importance as an educational ideal there is surprisingly little agreement about what the concept means exactly Also at issue is how and what students need to be taught in order to be properly critical in their field This searching monograph seeks answers to these important questions
