*Mind-body medicine and its impacts on psychological networks, quality of life, and health, volume II* Steffen Schulz, Georg Johannes Seifert, Dirk Cysarz, Frauke Musial, 2025-09-10 Living conditions in industrialized countries have led to a significant increase in life expectancy in recent decades. Likewise, the proportion of chronic diseases is growing. This includes cardiovascular diseases, chronic pain, inflammatory bowel diseases, and cancer. Unfavorable lifestyle factors such as accumulative stress, lack of exercise, and poor nutrition compounded by a persistent imbalance between exertion and recovery lead to the manifestation and chronicification of disease. A fundamental awareness of the connection between our mind, emotions, lifestyle, and health has grown. Understanding of body and mind interaction is increasing. The high clinical relevance is also supported and confirmed by evidence. Out of this field of research, mind-body medicine (MBM) has developed. MBM targets the interplay of body, mind, emotions, and behavior, extending to the regulation of vegetative physiological signaling pathways.

This book provides evidence-based homework assignments that track the psychotherapeutic interventions suggested by the fifth edition of *The Adolescent Psychotherapy Treatment Planner*. They are easily photocopied, and a digital version is provided online for the therapist who would prefer to access them with a word processor. The Homework Planner also offers cross-referenced lists of suggested presenting problems for which each assignment may be appropriate beyond its primary designation. Several brand-new assignments, as well as adapted assignments that have been shortened or modified to make them more adolescent client friendly, Homework assignments for the parents of adolescents, in-treatment assignments for the adolescents themselves, and assignments for parents and adolescents to complete together.
