Writing and Learning in the Science Classroom Carolyn S. Wallace, Brian B. Hand, Vaughan Prain, 2004-03-31 This volume is of interest to science educators, graduate students, and classroom teachers. The book will also be an important addition to any scholarly library focusing on science education, science literacy, and writing. This book is unique in that it synthesizes the research of the three leading researchers in the field of writing to learn science: Carolyn S. Wallace, Brian Hand, and Vaughan Prain. It includes a comprehensive review of salient literature in the field, detailed reports of the authors' own research studies, and current and future issues on writing in science. The book is the first to definitely answer the question: Does writing improve science learning? Further, it provides evidence for some of the mechanisms through which learning occurs. It combines both theory and practice in a unique way. Although primarily a tool for research, classroom teachers will also find many practical suggestions for using writing in the science classroom.

The purpose of this book is to help increase efficiency and effectiveness in writing professional documents, e.g., writing a concise yet thorough discharge statement to avoid repeated client call backs to clarify medical recommendations. The book also aims at improving the reader's confidence in writing skills through guided and well-thought-out homework or practice exercises. Useful for both veterinary students and practising vets, *Writing Skills for Veterinarians* addresses how to develop and hone veterinary medical and scientific writing techniques. The basics of veterinary writing and why it matters are covered before concentrating on specific written models expected of vets: creating medical documents, client and colleague communications, report writing, journal articles, and research papers and presentations. At the end of the book is a resource bank of additional exercises relating to each type of document.
