

OPERATING

Engaging Traction Assist

IMPORTANT: Avoid damage! Using the traction assist function improperly can damage the transaxle:

- Reduce speed and allow drive wheels to rotate at same speed before engaging or disengaging traction assist.
- Disengage traction assist when driving on dry asphalt or concrete.
- Use traction assist only when necessary for improved ground engagement.

1. Stop or slow machine down.

2. Push down on traction assist pedal (A). Pedal will remain engaged as long as pedal is depressed.

NOTE: Turning radius is increased when traction assist is engaged.

When brake pedal is depressed, traction assist will automatically engage.

Disengaging Traction Assist

1. Release traction assist pedal.
2. Once the load on the transmission is equalized and reduced, traction assist will disengage automatically.

Using Four-Wheel Drive

NOTE: Use four-wheel drive when more traction is needed. Tires will wear faster if four-wheel drive is always engaged.

Four-wheel drive enables the powertrain to drive all four wheels for improved traction on difficult ground conditions. Four-wheel drive can be engaged and disengaged on-the-go with light loads and on low-traction surfaces.

CAUTION: Avoid injury! Use extra caution when driving on slopes. To increase traction and provide four-wheel braking, engage mechanical front wheel drive (MFWD) when driving on slopes. Be aware that MFWD can improve access to dangerously sloped terrain, thereby increasing the possibility of tipover.

To improve braking on sloped, icy, wet, or gravelled surfaces, engage the MFWD. Add ballast to the tractor and travel at a reduced speed to avoid skidding and loss of steering control.

Ballasting

When operating in 4WD without a mower deck installed on machine, it is recommended you install rear wheel weights to increase stability:

- Install minimum of one BM17976 Weight Kit on each rear wheel.

Using 2WD/4WD Lever

M0013569

1. Move 2WD/4WD lever (A) forward to engage two-wheel drive.
2. Move 2WD/4WD lever (A) rearward to engage four-wheel drive.

Using 12-Volt Outlet

NOTE: Accessory must be rated at 20 amps or less.

CAUTION: Avoid injury! Safe operation requires your full attention. Do not wear radio or music headphones while operating machine.
