*AI in Popular Culture* Dal Yong Jin, 2025-12-08 This book examines the transformative impact of generative AI on cultural production with a particular focus on how AI technologies like ChatGPT are reshaping the creation of popular culture. Through a comprehensive analysis of both Global North and South perspectives, the book offers critical insights into AI governance, ethical considerations, and the future of cultural production in an increasingly AI integrated creative landscape. Tracing the evolution of AI in cultural industries from its early representations in films to its current active role in content creation across various media including film, television, music, and animation, the book explores how AI has shifted from being merely depicted in cultural works to becoming an integral tool in the creative process from pre production to post production stages. It critically analyzes three core concepts: creativity, control, and credentials (3Cs) in the context of AI driven cultural production, putting focus on the examination of precarious creativity, the tension between human creative expression and AI generated content. The work addresses crucial concerns about labor rights, job security, and creative control in the cultural industries. This book will interest graduate students and researchers in media studies, cultural studies, anthropology, globalization studies, sociology, and science and technology studies (STS) as well as interested policymakers and practitioners interested in AI's impact on the creative industries.

*Architecture in the Age of Artificial Intelligence* Neil Leach, 2025-04-17 AI has been unleashed. Nothing is going to be the same again. Updated to cover all the latest developments, *Architecture in the Age of Artificial Intelligence* introduces AI for designers and explores its seismic impact on the future of architecture and design. From ChatGPT and smart assistants to groundbreaking diffusion models for video and 3D modelling, this updated new edition investigates the profound effects of AI technologies on

architectural practice. It explores how AI transforms every part of the process from the inspiration and brief to regulations and copyright to performance driven design and looks beyond discussions of software and functionality to ask more fundamental questions too. How did AI evolve? How does it work? What does it tell us about creativity? And what does it mean for the very future of the profession itself? Written by one of the world's leading experts in the field, this book is a must-read for all architects wishing to stay at the forefront of the AI revolution.

**Leadership 2.0 in processes of a sustainable change** Prof. Dr. Michael Kurwan, 2025-06-30 Document from the year 2025 in the subject Leadership and Human Resources. Leadership language English abstract. In order to successfully implement sustainable changes in a company in the context of change processes strong leadership is required at the top of a company which should have a great deal of empathy and a sure instinct in order to position the company in the market in the long term and profitably. In order to successfully shape these sustainable changes it will not be the famous power of the leader of the past but will only work with the involvement of employees in the new world of work in the knowledge age which is characterized by digitalization and artificial intelligence. This new form of leadership is also referred to as Leadership 2.0 in which it is important to retain top performers and in particular key personnel in the company in the long term which is a very challenging leadership task in HR management. In change processes a fundamental distinction must be made between incremental change management and radical change management. While incremental change takes place continuously and is integrated into everyday working life, radical change represents a strategic realignment of the company which is largely associated with staff reductions and is intended to change the corporate culture. This is particularly true in the case of restructuring where cost cutting programs play a decisive role in ensuring the long term survival of the company. Employees are more willing to go along with incremental change also known as continuous improvement than radical change as they could also be affected by staff cuts. This fuels employees' fears and therefore often leads to high staff turnover.
