Terrorism in Cyberspace Gabriel Weimann, 2015-04-21 The war on terrorism has not been won. Gabriel Weimann argues in *Terrorism in Cyberspace*, the successor to his seminal *Terror on the Internet*. Even though al Qaeda's leadership has been largely destroyed and its organization disrupted, terrorist attacks take 12 000 lives annually worldwide and jihadist terrorist ideology continues to spread. How? Largely by going online and adopting a new method of organization. Terrorist structures traditionally consisting of loose net cells, divisions and subgroups are ideally suited for flourishing on the Internet through websites, e-mail, chat rooms, e-groups, forums, virtual message boards, YouTube, Google Earth and other outlets. Terrorist websites, including social media platforms, now number close to 10 000. This book addresses three major questions: why and how terrorism went online, what recent trends can be discerned, such as engaging children and women, promoting lone wolf attacks and using social media, and what future threats can be expected, along with how they can be reduced or countered. To answer these questions, *Terrorism in Cyberspace* analyzes content from more than 9 800 terrorist websites and Weimann, who has been studying terrorism online since 1998, selects the most important kinds of web activity, describes their background and history, and surveys their content in terms of kind and intensity, the groups and prominent individuals involved and effects. He highlights cyberterrorism against financial, governmental and engineering infrastructure, efforts to monitor, manipulate and disrupt terrorists' online efforts and threats to civil liberties posed by ill-directed efforts to suppress terrorists' online activities as future worrisome trends.
