you went to the holidays you have spent with your whole family the early days of childhood with other kids your history of jobs or even your divorce Remembered happiness is pretty much like the bigger picture or perspective on your state of happiness It is not surprising that experienced happiness and remembered happiness do not match all the time For instance millionaires in general have higher rate for their remembered selves compared to those people who only earn 50 000 each year However a millionaire might have more responsibilities in life He may experience more pressure in his work with a larger house to run and a spouse who is more demanding It only goes to say that even if they are earning millions these people might have lesser moments of spontaneous happiness during their day to day lives and living their lives less happily
