

# 05 MEET THE TEAM

The origins of the first constellations date back to prehistoric times. Their purpose was to tell stories of their beliefs, experiences, creation, or mythology.

The recognition of constellations has changed over time. They varied in size or shape, others became popular and then were forgotten, and some were limited to a single culture.

These 88 constellations divide the entire night sky as seen from Earth. Star maps are made from the brightest stars, and the patterns they form give rise to the constellation names.

## **CASSIOPEIA**

Not all constellations are visible from any point on Earth, so star maps are divided between the northern and southern hemispheres. Moreover, the constellations can change according to the season and the place on Earth where you are.

The star charts represent the position of the stars as we see them from Earth; however, the stars in each constellation may not be close to each other, as some we perceive to be brighter because they are close to the Earth, while others are brighter because they are huge stars.

These 88 constellations divide the entire night sky as seen from Earth. Star maps are made from the brightest stars, and the patterns they form give rise to the constellation names.
