Turbulence 2 Hans-Hermann Fernholz, Heinrich E. Fiedler, 2012-12-06 The Second European Turbulence Conference was held at the Technische Universität Berlin Federal Republic of Germany from August 30th to September 2nd 1988 under the auspices of the European Mechanics Committee. It was primarily devoted to fundamental aspects of turbulence and aimed at bringing together engineers, physicists and mathematicians. The scientific committee, serving also as Sub committee of the European Turbulence Conference, consisted of the following members: G. Comte Bellot Lyon, H. H. Fernholz and H. E. Fiedler, both from Berlin as co chairmen of the conference; U. Frisch, Nice; J. C. R. Hunt, Cambridge; E. Krause, Aachen; M. Landahl, Stockholm; A. M. Obukhov, Moscow; and G. Ooms, Amsterdam. The conference programme comprised 6 invited lectures and 94 contributions presented either orally or at poster sessions. There were 165 participants from 18 countries. All papers published in these conference proceedings were, with the exception of the invited ones, again refereed by the members of the scientific committee. The main research topics discussed at this meeting were: stability and generation of turbulence effects of rotation, stratification and buoyancy forces; novel instrumentation, manipulation and control; boundary layers with separation and reattachment; computer simulation; turbulent diffusion; image analysis and flow visualization; vorticity dynamics and turbulence and large scale structures. We have taken the liberty of regrouping some papers following the submitted final versions for this volume. Authors may therefore find their paper under a different heading from that in the conference programme.

The Jepson Manual

Bruce G. Baldwin, Douglas H. Goldman, 2012-01-31 California's extraordinary flora is described in contemporary detail in this handy volume, which should prove an inspiration to all of those interested in these plants, their habitats and their importance to a state richer in botanical diversity than any other part of the United States. This is a thorough revision of an indispensable book. Peter H. Raven, Missouri Botanical Garden. This second edition of *The Jepson Manual* is a monumental achievement. Far more than a simple update, the book has gone through a thorough revision, making it a must-have book for California plant enthusiasts, professionals and lay alike. Lucinda McDade, Rancho Santa Ana Botanic Garden. Biogeographers, vegetation ecologists and practitioners of conservation and restoration will all welcome the second edition of the *Jepson Manual*. Many improvements in this second edition include major taxonomic name changes, more information on habitat range, phenology, better keys and new illustrations. The second edition is more user-friendly, accurate and scientifically rigorous. And these improvements are exactly the kind of recent, authoritative and trusted flora needed. Michael G. Barbour, University of California, Davis.
