using the base year survey and dropout data from the first follow up About 93 percent of the parents of the first year sample were interviewed to provide information about home life and family experiences The parent component is not however a representative sample of eighth graders parents Their inclusion is linked to the student participants This study examined child directed involvement including activities such as parent child discussions and school directed involvement such as parent teacher association membership and volunteering in the school There was some indication that parent involvement was related to whether or not students scored below the basic level in reading or mathematics proficiency but there was a strong relationship between parent involvement and whether or not a student dropped out of school between the 8th and 10th grades There are 26 tables and 18 figures presenting study findings SLD *Teaching about Aging* Dena Shenk, Jay Sokolovsky, 1999 SpringBoard English Language Development ,2017
