Many spent his summer vacation traveling cross country with his family. Their first stop was Yellowstone National Park in Wyoming and because Yellowstone is famous for its geysers, especially one commonly called Old Faithful, a geyser is a spring that erupts intermittently, shooting a fountain of water and steam from a hole in the ground. Old Faithful can have particularly long and fairly predictable eruptions. As a matter of fact, park rangers have observed the geyser over many years and have discovered patterns they use to predict the timing of the next eruption.

Park rangers have recorded the information in the table below.

| Length of Eruption (in minutes) | Approximate Time Until Next Eruption (in minutes) |
|---------------------------------|---|
| 2.5 | 100 |
| 3.0 | 100 |
| 3.5 | 100 |

An Annotated Bibliography of North American Doctoral Dissertations on Old Norse-Icelandic Studies Kirsten Wolf, 1998 Kirsten Wolf's annotated bibliographical survey of doctoral dissertations written at North American institutions of higher learning and treating topics pertaining to Old Norse Icelandic language literature and culture provides a new tool for basic research. It also offers insight into trends and tendencies in scholarship within the field of Old Norse Icelandic in the United States and Canada from the last decades of the nineteenth century when the first doctoral dissertations in the field appeared to late 1995. Specifically it demonstrates a gradual shift from studies in language and style firmly rooted in Germanic philology to anthropological studies and literary analyses of individual works or themes. Author director and institution indices appear at the end of the volume. To facilitate research Wolf provides a subject index that includes not only titles of works and proper names but also concepts.
