**Weather and Bird Behaviour** Norman Elkins (météorologue), 1988      **The Natural History of Skokholm Island** Graham Victor Frederick Thompson, 2008-01-16 Skokholm is a remote island nature reserve located off the southwest coast of Pembrokeshire Wales Home to over 100 000 seabirds including the third largest Manx shearwater colony in the World it was made famous by pioneer naturalist Ronald Mathias Lockley in the 1930s and 1940s as a result of the many books that he wrote about it He leased Skokholm for 20 years from 1928 until 1948 during which time he established Britain's first Bird Observatory in 1933 The field outing of the 8th International Ornithological Congress was held on the island in the following year The Pembrokeshire Bird Protection Society now the Wildlife Trust of South West Wales of which Lockley was a founder took over the lease in 1948 and ran the island as a ringing station and nature reserve In 1954 it was notified as a Site of Special Scientific Interest A huge number of studies have been carried out looking into the lives of the various birds the House Mice and Rabbits invertebrates plants and plant communities In 1963 the Edward Grey Institute for Field Ornithology became involved and began a number of studies looking at seabird biology and populations The Council for the Promotion of Field Studies now the Field Studies Council was at this time running the island under license from the Wildlife Trust The Medical Research Council and then the Royal Free Hospital School of Medicine undertook a study on the genetically unique island House Mouse and the Ministry of Agriculture studied the Rabbit population as the disease Myxomatosis swept across Britain but did not affect the island animals at all making the site even more interesting      **Birds in Scotland** Valerie M. Thom, 2010-11-30 The most important work on the birds of Scotland ever published British Birds This comprehensive study and review of the birds in Scotland follows on from where the celebrated two volumes of The Birds of Scotland 1953 by Dr Baxter and Miss Rintoul left off It does more than that however since not only has there been a profound increase in ornithological coverage and data as reflected in the species accounts there have also been great changes in habitat and environment since the days of Baxter there are also brief summaries of earlier data based on the researches of Baxter Rintoul In all 497 species are dealt with The texts of major species accounts are complemented by 173 distribution maps and many tables of relevant data and there are 129 species drawings by a team of artists under the editorship of Donald Watson who also contributes chapter head pieces and other drawings A section of photographs illustrates the varied habitats typical of

Scotland today There are further appendices and an extensive bibliography The book will be of great interest to all birdwatchers in Scotland but of special value too to the many thousands of birdwatching visitors from elsewhere in these islands and from countries abroad The Scottish Ornithologists Club for whom the book is published and all whose records and researches made the author's work possible have reason to be proud of Valerie Thom's achievement *Ornithologies of Desire* Travis V.
