Emdad,Suei Chin,P. Sundaram,S. C. Mehrotra,R. K. Tripathi,1991 A computational method for lateral directional aerodynamics of fighter configurations is developed The leading edge vortices are represented by free vortex filaments which are adjusted iteratively to satisfy the force free condition The forebody vortex separation both symmetrical and asymmetrical is calculated using slender body theory Effect of boundary layer separation on lifting surfaces is accounted for using the effective sectional angels of attack The latter are obtained iteratively by matching the nonlinear sectional lift with the computed resulted based on lifting surface theory Results for several fighter configurations are employed for comparison with available data It is shown that the present method produces reasonable results in predicting sideslip derivatives while roll and yaw rate derivatives do not compare very well with forced oscillation test data at high angles of attack Industrial usage of this has produced mixed results At this time the use of these methods in a production manner is not recommended EPA Publications Bibliography ,1997 **Moody's Municipal & Government Manual** ,1941 **The American School Board Journal** ,1925 **Texas State Publications** Texas State Publications Depository Program,1998 *Popular Science* ,1948-09 Popular Science gives our readers the information and tools to improve their technology and their world The core belief that Popular Science and our readers share The future is going to be better and science and technology are the driving forces that will help make it better **Leaders in Education** James McKeen Cattell,1948 Proceedings of the ASP-DAC ...
