

A photograph of an Amazon storefront. The building has a grey upper section with the 'amazon' logo in white. Below the logo is a black awning. The entrance features large glass windows and double doors. Inside, the store is brightly lit with warm yellow lights. Various items are visible through the glass, including what appears to be a mannequin and some shelving. The overall scene is a typical retail storefront for an Amazon store.

The 21st Century in 100 Games is an interactive public history of the contemporary world. It creates a ludological retelling of the 21st century through 100 games that were announced, launched, and played from the turn of the century. The book analyzes them and then uses the games as a means of entry to examine both key events in the 21st century and the evolution of the gaming industry. Adopting a tri-pronged perspective, the reviewer, the academic, and an industry observer, it studies games as ludonarratological artefacts and resituates games in a societal context by examining how they affect and are engaged with by players, reviewers, the gaming community, and the larger gaming industry. This book will be a must-read for readers interested in video games, new media, digital culture, culture studies, and history.

*Management Information Systems* James A. O'Brien, George M. Marakas, 2008. The benchmark text for the syllabus, organized by technology: a week on databases, a week on networks, a week on systems development, etc., taught from a managerial perspective. O'Brien defines technology and then explains how companies use the technology to improve performance. Real-world cases finalize the explanation.
