Bestselling author, leading sociologist, and economist Juliet Schor makes the case for a four-day work week, persuasively showing how this model can address major challenges such as burnout, AI, and the climate crisis, and how employees, companies, and governments can work together to make it a reality. Around the world, long hours and intense pressure are taking their toll. When the pandemic hit in 2020, work-induced stress and burnout skyrocketed. Many reached a breaking point. Now, three-quarters of the world's employees are disengaged and struggling, including in the US and Canada, where half are experiencing high levels of daily stress. Kickstarter, Bolt, Basecamp, ThredUp, and hundreds of other employers have eliminated the fifth day of work successfully, figuring out how to maintain productivity while seeing

Leadership 2.0 in processes of a sustainable change Prof. Dr. Michael Kurwan, 2025-06-30 Document from the year 2025 in the subject Leadership and Human Resources Leadership language English abstract In order to successfully implement sustainable changes in a company in the context of change processes strong leadership is required at the top of a company which should have a great deal of empathy and a sure instinct in order to position the company in the market in the long term and profitably In order to successfully shape these sustainable changes it will not be the famous power of the leader of the past but will only work with the involvement of employees in the new world of work in the knowledge age which is characterized by digitalization and artificial intelligence This new form of leadership is also referred to as Leadership 2.0 in which it is important to retain top performers and in particular key personnel in the company in the long term which is a very challenging leadership task in HR management In change processes a fundamental distinction must be made between incremental change management and radical change management While incremental change takes place continuously and is integrated into everyday working life radical change represents a strategic realignment of the company which is largely associated with staff reductions and is intended to change the corporate culture This is particularly true in the case of restructuring where cost cutting programs play a decisive role in ensuring the long term survival of the company Employees are more willing to go along with incremental change also known as continuous improvement than radical change as they could also be affected by staff cuts This fuels employees fears and therefore often leads to high staff turnover
