Quantified Storytelling Alex Georgakopoulou, Stefan Iversen, Carsten Stage, 2020-09-19 This book interrogates the role of quantification in stories on social media how do visible numbers e g of views shares likes and invisible algorithmic measurements shape the stories we post and engage with The links of quantification with stories have not been explored sufficiently in storytelling research or in social media studies despite the fact that platforms have been integrating sophisticated metrics into developing facilities for sharing stories with a massive appeal to ordinary users influencers and businesses alike With case studies from Instagram Reddit and Snapchat the authors show how three types of metrics namely content metrics interface metrics and algorithmic metrics affect the ways in which cancer patients share their experiences the circulation of specific stories that mobilize counter publics and the design of stories as facilities on platforms The analyses document how numbers structure elements in stories indicate and produce engagement and become resources for the tellers self presentation This book will be of interest to students and scholars working in the fields of narrative and social media studies including narratology biography studies digital storytelling life writing narrative psychology sociological approaches to narrative discourse and sociolinguistic perspectives

The ethics of researching the far right Antonia Vaughan, Joan Braune, Meghan Tinsley, Aurelien Mondon, 2024-05-07 At a time when far radical and extreme right politics are becoming increasingly mainstream globally sometimes with deadly consequences research in these fields is essential to understand the most effective ways to combat these dangerous ideologies Yet engaging with texts and movements that do physical and verbal violence raises a number of urgent ethical issues Until recently this has remained understudied as scholarship on the far right rarely delves explicitly and critically into the ethics of research This book seeks to remedy this significant gap in an otherwise extensive and growing literature Originating from a workshop series in 2020 in which an international group of academics at various career stages shared the ethical challenges and best practices they had developed in their research this edited collection draws together insights from these ongoing conversations offering urgent critical reflections on key ethical issues

2030 Mauro F. Guillén, 2020-08-25 AN INTERNATIONAL BESTSELLER Wall Street Journal Bestseller A Porchlight Book Bestseller Financial Times Best Books of 2020 Yahoo Finance Favorite Business Books of 2020 JP Morgan NextList 2021 selection Bold provocative illuminates why we re having fewer babies the middle class is stagnating unemployment is shifting and new powers are rising ADAM GRANT The world is changing drastically before our eyes will you be prepared for what comes next A groundbreaking analysis from one of the world s foremost

experts on global trends including analysis on how COVID 19 will amplify and accelerate each of these changes Once upon a time the world was neatly divided into prosperous and backward economies Babies were plentiful workers outnumbered retirees and people aspiring towards the middle class yearned to own homes and cars Companies didn't need to see any further than Europe and the United States to do well Printed money was legal tender for all debts public and private We grew up learning how to play the game and we expected the rules to remain the same as we took our first job started a family saw our children grow up and went into retirement with our finances secure That world and those rules are over By 2030 a new reality will take hold and before you know it There will be more grandparents than grandchildren The middle class in Asia and Sub Saharan Africa will outnumber the US and Europe combined The global economy will be driven by the non Western consumer for the first time in modern history There will be more global wealth owned by women than men There will be more robots than workers There will be more computers than human brains There will be more currencies than countries All these trends currently underway will converge in the year 2030 and change everything you know about culture the economy and the world According to Mauro F Guillen the only way to truly understand the global transformations underway and their impacts is to think laterally That is using peripheral vision or approaching problems creatively and from unorthodox points of view Rather than focusing on a single trend climate change or the rise of illiberal regimes for example Guillen encourages us to consider the dynamic inter play between a range of forces that will converge on a single tipping point 2030 that will be for better or worse the point of no return 2030 is both a remarkable guide to the coming changes and an exercise in the power of lateral thinking thereby revolutionizing the way you think about cataclysmic change and its consequences
