**Sunk Cost** Jillian Berman,2025-04-08 Exposes the forgotten origins of the student loan system how politicians have attempted to fix it and the life altering damage borrowers face Student loan horror stories are a dime a dozen But students today are faced with a seemingly insurmountable paradox Research consistently shows that the clearest viable option to financial stability is a college degree But if and when Americans decide to pursue diplomas student loan payments quickly follow and even after securing full time employment many borrowers struggle to make ends meet for years In Sunk Cost journalist Jillian Berman explores how the nation's student loan program went from a well intentioned initiative aimed at helping low and middle income students afford college to one that traps borrowers in long term debt Berman interviewed dozens of borrowers and policymakers and dug into the archives to unearth the true causes of the student loan problem A couple of generations ago policy makers generously subsidized Americans college educations because they knew it would be advantageous for the entire country a more educated population meant better quality of life for all But today higher education is viewed as an individual goal so students and their families are expected to be on the hook for it themselves Berman explains how this enormous shift happened which industries benefit from it and what it means for college going Americans today She shares real life stories of college graduates who are being crushed under some of the harshest consequences of the student loan system These borrowers pursued higher education in hopes of a better life and yet some have been trapped in debt for decades making it difficult to put food on the table much less imagine a life beyond debt By connecting personal accounts to the policy history of student loans Berman makes clear that if American society continues to push students toward higher education but fails to truly

subsidize it the financial strain will become unbearable for all but the most privileged The current system is broken but Berman proposes that significant changes are possible and will require political will from state lawmakers and Congress along with a philosophical shift to tackle one of the largest consumer finance challenges of our time National Audit Office - Department for Business, Innovation and Skills: Student Loan Repayments - HC 818 Great Britain: National Audit Office,2013-11-28 Until the Department for Business Innovation and Skills BIS has a robust strategy for maximizing the collection performance of student loans and improves its information on borrowers it will not be well placed to secure value for money BIS forecasts that the total value of outstanding student loans will increase from 46 billion in 2013 to approximately 200 billion by 2042 in 2013 prices The number of borrowers due to repay is projected to increase from 3 million in 2012 13 to 6 5 million by 2042 The loan book is therefore becoming a substantial public asset BIS and its collection partners HM Revenue Customs and the Student Loans Company SLC work together in a joined up way In 2012 13 they collected 1 4 billion in student loan repayments at a cost of 27m BIS needs to make better use of data to support its collection strategy and improve its understanding of where it could invest to maximise the collection value of the loan book In designing how student loans would work BIS anticipated that a proportion of the loans would not be repaid However BIS has not set an annual target for the amount to be collected because repayments are affected by graduate earnings and economic factors outside its direct control Annual repayment forecasts are consistently higher than amounts collected While many borrowers may not be in employment BIS and the SLC have carried out little analysis to establish how many may be working overseas or the level of repayments that may be missed *Parental Support, Savings and Student Loan Repayment* Lance Lochner,Todd R. Stinebrickner,Utku Suleymanoglu,2018 Using unique survey and administrative data from the Canada Student Loans Program we document that parental support and personal savings substantially lower student loan repayment problems We develop a theoretical model for studying student borrowing and repayment in the presence of risky labor market outcomes moral hazard and costly earnings verification This framework demonstrates that non monetary costs of applying for income based repayment assistance are critical to understanding why resources other than earnings lead to greater repayment We further show that eliminating these non monetary costs may be inefficient and lead to undesirable redistribution Empirically we demonstrate that expanding Canada s income based Repayment Assistance Plan to automatically cover all borrowers would likely reduce program revenue by nearly one half over early years of repayment Finally we show how student loan programs can be more efficiently designed to address heterogeneity in parental transfers in the presence of non monetary earnings verification costs and moral hazard Student Loan Repayment Guide Colorado Student Loan Program,2001
