**Children's Mathematics** Elizabeth Carruthers, Maulfry Worthington, 2006-08-07 In Case Study 5 a grassroots Children's Mathematics Network group the initiative supported the participants in their professional change by giving them a space for the detailed and joint consideration of children's mathematical thinking Another significant feature of this initiative is its focus on careful consideration and analysis of children's mathematics and the ways in which professionals can support and encourage the children's mathematical thinking and reasoning The standard of the mathematical understanding thinking and reasoning that the displays revealed was far higher than the specified curriculum objectives for children of this age Researching Effective CPD in Mathematics Education RECME project NCETM 2009 The review also plays great score by play based learning of a mathematical nature and makes specific recommendations regarding early mark making as a precursor to abstract mathematical symbolism Section 115 features children's mathematical graphics and emphasises The role of mark making in children's cognitive development is set out in the taxonomy Carruthers and Worthington 2006 The report recommends that local authorities leaders managers and head teachers should provide a culture with a significant focus on mathematical mark making and a learning environment that encourages children to choose to use their own mathematical graphics to support their mathematical thinking and processes The Williams Maths Review DCSF 2008 At the very heart of the success of the book is the authors ability to see mathematics through young children's eyes by listening to and reflecting on the constant efforts made by children to make sense of their world This is a liberating book which proposes that the teaching of mathematics could and should be a highly creative and enjoyable process Branwen Llewelyn Jones Early Years Consultant at PACE Ltd TACTYC Ground breaking To single out any one chapter would be unfair because there is something thought provoking and inspirational throughout If you want to expand your understanding upwards and outwards then get a copy soon Times Educational Supplement I first read Children's Mathematics Making Marks Making Meaning a couple of years ago and it had an immediate impact on my own thinking and teaching and the work I do with trainee teachers I'm sure

you will find it compelling reading too I think it has the potential to change in a fundamental way how we think about early mathematical development Lynne McClure Editor Math Coordinator s File Mathematics Association In their exceptionally readable and informative book *Children s Mathematics Making Marks Making Meaning* Carruthers and Worthington 2006 draw attention to one of the main goals of early years teaching that is to help children make links between the mathematics they have already encountered and continue to engage with at home and the more abstract mathematics of the school These authors suggest that by encouraging children to represent mathematical ideas in their own ways and crucially by talking to the pupils about the marks they have made we are given a window onto their thinking that may otherwise be inaccessible Liz Pumphrey NRICH This book draws on the authors many years of teaching children aged three to eight years and also on their extensive research with children in the home nursery and school The authors explain the development and range of young children s mathematical marks and visual representations showing how children make mental connections between their own early marks and subsequent abstract mathematical symbolism and go on to develop their own written methods Combining theory and practice this acclaimed book demonstrates how children s own mathematical graphics are highly creative and show deep levels of thinking The authors show how this is the key to success in school mathematics and to higher levels of achievement The authors are winners of TACTYC s 2003 Jenefer Joseph Award for the Creative Arts 3 8 awarded for their innovative work with children on mathematical graphics *Teaching Children with Dyslexia* Philomena Ott, 2007-05-07 Written by one of the most well regarded practitioners in the field this book is packed full of photocopiable exercises and suggestions for strategies and techniques that are instantly transferable to classroom environments **Improvement of Instruction in Rural Schools Through Professional Supervision** Alfred Zantzinger Reed, Eustace Evan Windes, Harry Stanley Ganders, Mary G.
