## Science Experiments Ai Video Editor 2025:

*Unleashing User Innovation* Mohammad Amin Kuhail, Mostafa Mohamad, Rawad Hammad, Mohammed Bahja, 2025-12-31

The convergence of End User Development EUD and Generative Artificial Intelligence GenAI ushers in a transformative era in which creators and consumers are no longer sharply divided and users are empowered to innovate as never before. *Unleashing User Innovation: Multidisciplinary Perspectives on End User Development and Generative AI* explores this dynamic intersection by bringing together diverse perspectives to highlight how these technologies are reshaping how we interact, learn, and innovate. With the perspective that new challenges require user-driven solutions, the book explores how EUD allows non-technical users to adapt and create tools for their needs, while GenAI infuses the creative capability for creating human-like output from natural language to multimedia. Together, EUD and GenAI can allow the democratization of innovation and open unimagined possibilities. The book traces the evolution of EUD with an overview of the tools designed for chatbot development, examines the educational landscape and shows how GenAI empowers educators to use AI as consumers and collaborators in shaping educational futures, presents state-of-the-art applications of GenAI in personalizing education to improve comprehension and support special education, explores the versatility of GenAI applications in tourism and immersive experiences, public health, and financial systems, covers major ethical policy and global considerations driving responsible AI deployment. By exploring the intersection of diverse fields, the book reveals how generative AI empowers individuals engaged in end user development to unlock their creative potential. It emphasizes the role of generative AI in enabling these developers to create innovative software solutions effectively. With a focus on cutting-edge advancements, the book showcases how the integration of generative AI fosters a collaborative environment that bridges the gap between technical and non-technical users, thereby democratizing development and fostering innovation.

[An Intelligent Video Editing Automate Framework Using AI and Computer Vision](#) Haolin Xie, Yu Sun, 2022. At present, many video editing software have been created, but what they all have in common is that they require manual work to edit. And it takes a lot of time, and the user needs to watch each frame before editing. In this paper, we have developed a program about AI intelligence. The most important point of this software is that it can automatically focus the face of a person and edit only selected clips of the person to make a complete video. Users only need to prepare the video they want to edit and a photo of the main character. Then upload both to the software, and AI Intelligence will automatically edit it, providing the user with a way to download and save it after editing the main character they need. We applied our application to an example video using the Marvel character Hawkeye as he appears in *End Game* and tried many experiments with the clip. Eventually, we tried many experiments with the clip and finally got a video of our selected character. The results show that this software saves the user a lot of time and is highly efficient. All operations are carried out by AI.
