

1. **Identify the problem.** The first step is to identify the problem. This involves understanding the symptoms and the context in which they are occurring.

2. **Define the problem.** Once the problem is identified, it needs to be defined. This involves stating the problem in clear, concise terms.

3. **Set priorities.** After defining the problem, the next step is to set priorities. This involves determining which aspects of the problem are most important and need to be addressed first.

4. **Develop a plan.** The fourth step is to develop a plan. This involves creating a strategy for addressing the problem and identifying the resources needed to implement the plan.

5. **Implement the plan.** The fifth step is to implement the plan. This involves putting the plan into action and monitoring progress.

6. **Evaluate the results.** The final step is to evaluate the results. This involves assessing the effectiveness of the plan and making adjustments as needed.
