Sjoerd Soetersarchitect:

Sjoerd Soeters Hans Ibelings, Sjoerd Soeters, 1996 Monografie van de Nederlandse architect 1947 ontwerper van o.a. het amusementspaleis in Zandvoort Gids voor hedendaagse architectuur in Nederland Paul Groenendijk, Piet Vollaard, 2004 Containing over 300 entries this guide presents an overview of the most recent developments in Dutch architecture and urban design from the 1980s to the present day Its compact shape practical layout and extensive indexes make this guide an indispensable source of inspiration and reference work on the practice of Dutch architecture today Includes work by Koolhaas Mecanoo Arets van Berkel van Egeraat Foster De Geyter Hertzberger Krier MVRDV Neutelings Riedijk Graves Benthem Crouwel Nox and many others *Architecture and its Ethical Dilemmas* Nicholas Ray, 2007-05-07 A cast of leading writers and practitioners tackle the ethical questions that architects are increasingly facing in their work from practical considerations in construction to the wider social context of buildings their appearance use and place in the narrative of the environment This book gives an account of these ethical questions from the perspectives of historical architectural practice philosophy and business and examines the implications of such dilemmas Taking the current discussion of ethics in architecture on to a new stage this volume provides an accumulation of diverse opinions focusing on architects actions and products that materially affect the lives of people in all urbanized societies *Loose-Fit Architecture* Alex Lifschutz, 2018-02-05 Loose Fit Architecture Designing Buildings for Change September October 2017 Profile 249 Volume 87 No 5 ISBN 978 1119 152644 Guest Edited by Alex Lifschutz The idea that a building is finished or complete on the day it opens its doors is hardwired into existing thinking about design planning and construction But this ignores the unprecedented rate of social and technological change A building only begins its life when the contractors leave With resources at a premium and a greater need for a sustainable use of building materials can we still afford to construct new housing or indeed any buildings that ignore the need for flexibility or the ability to evolve over time Our design culture needs to move beyond the idealisation of a creative individual designer generating highly specific forms with fixed uses The possibilities of adaptation and flexibility have often been overlooked but they create hugely exciting loose fit architectures that emancipate users to create their own versatile and vibrant environments Contributors include Stewart Brand Renee Chow Ellen Dunham Jones and June Williamson John Habraken Edwin Heathcote Despina Katsakakis Stephen Kendall Ian Lambot Giorgio Macchi Alexi Marmot Andrea Martin Kazunobu Minami Peter Murray Brett Steele and Simon Sturgis

Gids voor moderne architectuur in Nederland Paul Groenendijk, Piet Vollaard, Piet Rook, 1998 Reis gids voor moderne Nederlandse architectuur waarin ruim 700 objecten worden afgebeeld en beknopt beschreven **Architecture In Use** DJM van der Voordt, HBR van Wegen, 2007-06-01 This unique book discusses programming design and building evaluation providing a joined up approach to building design By linking the functional and architectonic qualities of a building the authors show the practical implications of the utility value of buildings Starting by looking at how the relationship between

form and function has been dealt with by different approaches to architecture from a historical perspective it goes on to discuss how the desired functional quality and utility value of a building can be expressed in a brief and given a physical form by the architect Finally it advises on how to carry out post occupancy evaluation and provides the architect with methods and techniques for testing whether the intended utility value of a building has been achieved *The Architectural Review* ,2006
