Proceedings of the International Conference on Recent Advances in Artificial Intelligence for Sustainable Development (RAISD 2025) Piyush Ranjan, Sumit Kumar Pandey, Kailash Pati Dutta, Md. Irfan Alam, 2025-07-17 This open access volume presents select proceedings of Recent Advances in Artificial

Intelligence for Sustainable Development RAISD *Design Activism* Alastair Fuad-Luke, 2013-06-17 Design academics and practitioners are facing a multiplicity of challenges in a dynamic complex world moving faster than the current design

paradigm which is largely tied to the values and imperatives of commercial enterprise Current education and practice need to evolve to ensure that the discipline of design meets sustainability drivers and equips students teachers and professionals for the near future New approaches methods and tools are urgently required as sustainability expands the context for design and what it means to be a designer Design activists who comprise a diverse range of designers teachers and other actors are setting new ambitions for design They seek to fundamentally challenge how where and when design can catalyse positive impacts to address sustainability They are also challenging who can utilise the power of the design process To date examination of contemporary and emergent design activism is poorly represented in the literature This book will provide a rigorous exploration of design activism that will re-vitalise the design debate and provide a solid platform for students teachers design professionals and other disciplines interested in transformative design activism Design Activism provides a comprehensive study of contemporary and emergent design activism This activism has a dual aim to make positive impacts towards more sustainable ways of living and working and to challenge and reinvigorate design praxis It will collate synthesise and analyse design activist approaches processes methods tools and inspirational examples outcomes from disparate sources and in doing so will create a specific canon of work to illuminate contemporary design discourse Design Activism reveals the power of design for positive social and environmental change design with a central activist role in the sustainability challenge Inspired by past design activists and set against the context of global local tensions expressions of design activism are mapped The nature of contemporary design activism is explored from individual collective action to the infrastructure that supports it generating powerful participatory design approaches a diverse toolbox and inspirational

outcomes This is design as a political and social act design to enable adaptive societal capacity for co futuring **Energy Efficiency in Buildings** José Manuel Andújar,Sergio Gómez Melgar,2020-04-28 Buildings are one of the main causes of the emission of greenhouse gases in the world Europe alone is responsible for more than 30% of emissions or about 900 million tons of CO2 per year Heating and air conditioning are the main cause of greenhouse gas emissions in buildings Most buildings currently in use were built with poor energy efficiency criteria or depending on the country and the date of construction none at all Therefore regardless of whether construction regulations are becoming stricter the real challenge nowadays is the energy rehabilitation of existing buildings It is currently a priority to reduce or ideally eliminate the waste of energy in buildings and at the same time supply the necessary energy through renewable sources The first can be achieved by improving the architectural design construction methods and materials used as well as the efficiency of the facilities and systems the second can be achieved through the integration of renewable energy wind solar geothermal etc in buildings In any case regardless of whether the energy used is renewable or not the efficiency must always be taken into account The most profitable and clean energy is that which is not consumed *Sams Teach Yourself Google SketchUp 8 in 10 Minutes*
