Systema The Russian Martial System:

Systema Giuseppe Filotto, 2011-02-19 PLEASE NOTE This book also includes exclusive access to 40 instructional videos that cover various practices detailed in the text. This is the first complete training manual for Systema the Russian Martial Art developed for use by the elite ex Soviet Special Operation Units of Spetsnaz. Nowhere else has the previously often classified material found in these pages been collated in one place for civilian use. Many personal anecdotes and experiences throughout the book make for an entertaining, humorous and informative read. In the typically unorthodox fashion of Systema itself this is no dry text book but an easy to use teaching aid and a very human study. Includes previously classified scientific information that relates to the underlying principles of military and sports science. The latest scientific research on supposedly superhuman abilities and how to easily develop these in simple and effective ways. Learn how to perform three of the mini superpowers in no more than 30 minutes each to satisfy yourself that the concepts in this book are NOT hype but just pure science repeatable and learnable by anyone willing to do the work. Learn the more powerful abilities often considered impossible by most hard core martial artists until these are performed on them. Easy to follow explanations on the basic principles of military sports science and how they relate to real life survival of combat. Useful for anyone involved not just in martial arts but any sports in general and in fact most human activities as the principles presented are applicable not just to Systema but to any practical human endeavour.

[The Complete Book of Combat Systema](#) Kevin Secours, 2016-02-01

In 1998 while changing after a kali training session a friend approached Kevin Secours with a videocassette and asked You ever seen the Russian martial arts. Looking at the Cyrillic label on the video Secours asked Any good. It's interesting the friend replied. Weird as hell but interesting. Little did Secours know that tape would be his introduction to a 16 year and counting journey into the unorthodox world of the Russian martial arts including years of high level training under top Russian masters. On the video Secours saw mobility exercises unlike anything he had ever experienced. As he was to learn the uniqueness of the Russian martial arts stemmed from the uniqueness of the country itself. The Cold War in the 1950s during which the superpowers battled for supremacy was the final forge that refined the Russian martial arts into what they are today. In anticipation of global warfare the Soviet government commissioned combat researchers to travel throughout the world to study different approaches. They tested these methods and integrated the best concepts with their own native traditions. This period of development led to the creation of distinct Soviet martial arts including Sport Sambo, Combat Sambo and Samoz which was later modified and became known simply as Systema literally the System. Approaching Systema from a decidedly Western perspective Secours pressure tested the strengths and benefits of every concept and technique and ultimately took only what served him. He built his Combat Systema curriculum on a scientific approach to bio mechanics, breath training and combat psychology. In [The Complete Book of Combat Systema](#) he keeps things practical, provable and profitable for you to incorporate what works into your self defense training.
