**Systems-Centered Practice** Yvonne M. Agazarian, 2020-06-16 Systems Centered Practice presents a series of papers that trace the development of the theory of living human systems between 1987 and 2002. As the theory develops so do the methods and techniques that put it into practice. The book also describes in detail the connection between the hierarchy of defence modification and the specific phases of system development that determine readiness for change. The papers in this volume contribute to our knowledge of the permeability of the boundaries between clinical and social psychology through the investigation of living human systems and of systems centered group and individual therapy. The author's considerable body of work constitutes a blend of creativity and learning of the highest order.

**Systems-Centered Training** Yvonne M. Agazarian, Susan P. Gantt, Frances B. Carter, 2020-12-30 This illustrated book shows how thinking systems offer new ways of seeing people which can help us see and do things differently. The authors describe how a theory of living human systems was developed and even recently revised. This major revision led to a theory of the person as a system and its role systems map that helps us see which system in us and in others is running the show. The authors illustrate how life force energy fuels the hierarchy of living human systems and how theory and practice with role systems can be useful in everyday life. They begin with describing how they have used the new illustrations as a map to locate the contexts of our roles. Using this map has also enabled the authors to identify the role systems and explore the territory of ourselves and our groups in new ways that deepened our understanding of roles and role locks. This book illustrates systems centered therapy and training (SCT) theory by offering a practical theory to guide group psychotherapists, leaders and consultants in working with group dynamics.
