

A scenic autumn forest with a river and a boat. The image shows a dense forest of trees with vibrant autumn foliage in shades of green, yellow, and orange. A calm river flows through the center of the forest, reflecting the colorful trees and the sky. On the left bank, a small wooden boat is moored. The overall atmosphere is peaceful and serene, capturing the beauty of the fall season.

**Space in Diachrony** Silvia Luraghi, Tatiana Nikitina, Chiara Zanchi, 2017-08-14 Space is a fundamental dimension of human life and is pervasive in human experience Research on space has highlighted the possible asymmetrical nature of spatial relations Differences in the encoding of goals and sources of motion are a case in point and cross linguistic coding tendencies show that path is less frequently flagged by a dedicated case than goal source origin and static location locative

Interestingly such asymmetries may correlate with certain types of landmark as in the case of toponyms or of animate entities Even though these issues have been focused upon both in typological and psycholinguistic research they remain largely open The papers in this collection aim to show that a diachronic approach may shed light on the way in which asymmetries in the space domain come about over time thus contributing to the clarification of synchronically puzzling facts
