Ai Overview Ideas:

Readings in Artificial Intelligence and Databases John Mylopoulos, Michael L. Brodie, 2014-06-28 The interaction of database and AI technologies is crucial to such applications as data mining active databases and knowledge based expert systems. This volume collects the primary readings on the interactions actual and potential between these two fields. The editors have chosen articles to balance significant early research and the best and most comprehensive articles from the 1980s. An in depth introduction discusses basic research motivations giving a survey of the history concepts and terminology of the interaction. Major themes approaches and results open issues and future directions are all discussed including the results of a major survey conducted by the editors of current work in industry and research labs. Thirteen sections follow each with a short introduction. Topics examined include semantic data models with emphasis on conceptual modeling techniques for databases and information systems and the integration of data model concepts in high level data languages definition and maintenance of integrity constraints in databases and knowledge bases natural language front ends object oriented database management systems implementation issues such as concurrency control and error recovery and representation of time and knowledge incompleteness from the viewpoints of databases logic programming and AI

Teaching Information Seeking Jon Ostenson, 2025-05-30 Teaching Information Seeking redefines how we approach research and information literacy in today's information rich world inviting teachers to re-imagine teaching research. The book combines insights from fields such as library and information sciences, journalism and media literacy to offer fresh strategies and perspectives for guiding students through evolving landscapes of information. While a focus on concepts and skills has long been important in teaching research this book integrates significant new understandings about the role dispositions play in how well students embrace and utilize skill-based knowledge. The book provides conceptual knowledge and learning activities that support writing teachers as they help students learn throughout the research or inquiry process of asking questions, finding information and sharing their learning purposefully and ethically. Chapters with a pedagogical focus and approach include activities informed by the author's decades of experience teaching writing. These activities are described in depth including assignment prompts, sample work and scripts for think aloud protocols and discussions the author has led that engage students in deeper learning around these critical skills and dispositions. Teaching Information Seeking serves as a comprehensive guide for educators looking to foster meaningful information literacy and critical thinking skills in their students. This book is ideal for teachers and teacher educators who want to equip students with the skills and dispositions needed for effective research and information literacy.

Readers will find teacher friendly research grounded insights and activities that can be readily applied in the classroom
