Wallace, 1898 **The illustrated official journal (patents)**, 1927 **User Unfriendly** Joseph J. Corn, 2011-11-01 We've all been there Seduced by the sleek designs and smart capabilities of the newest gadgets we end up stumped by their complicated set up instructions and exasperating error messages In this fascinating history Joseph J. Corn maps two centuries of consumer frustration and struggle with personal technologies Aggravation with the new machines people adopt and live with is as old as the industrial revolution Clocks sewing machines cameras lawn mowers bicycles electric lights cars and computers all can empower and exhilarate but they can also exact a form of servitude Adopters puzzle over which type and model to buy and then how to operate the device diagnose its troubles and meet its insatiable appetite for accessories replacement parts or upgrades It intrigues Corn that we put up with the frustrations our technology thrusts upon us battling with the unfamiliar and climbing the steep learning curves It is this ongoing struggle more than the uses to which we ultimately put our machines that animates this thought provoking study Having extensively researched owner's manuals computer user group newsletters and how to literature Corn brings a fresh consumer oriented approach to the history of technology User Unfriendly will be valuable to historians of technology students of American culture and anyone interested in our modern dependence on machines and gadgets *Monthly Catalog of United States Government Publications* United States. and women developed and expanded Singer's selling system to the extent that the multinational company was seen as domestic both in the location sense and because of its focus on the private sphere of the home. By bringing the cases of Spain and Mexico and the cultural everyday realm of practices related to sewing and embroidery that the sewing machine was part of to the center of the study of international business, Gendered Capitalism further reveals the layers of complexities and multitudes that conform the history of global capitalism. This book will be of interest to readers and scholars in the fields of business history, economic cultural history, management studies, international business, women's history, gender studies, and the history of technology.
