

Example SJT question (ranking format):

A 55-year-old woman with ischaemic heart disease has smoked 20 cigarettes per day for 40 years. She requests nicotine replacement patches. She has had these previously but has been inconsistent in their use and has often continued to smoke while using the patches.

- A. Emphasise the dangers of smoking but do not prescribe
- B. Enquire about the difficulties she has with stopping smoking and any previous problems with patches
- C. Insist on a period of abstinence before prescribing any further patches
- D. Prescribe another supply of patches and explain how they should be used
- E. Suggest that nicotine replacement therapy is not suitable for her but explore alternative therapies

Example SJT question (multiple response format):

Terry and Jamie, identical twins, attend your practice regularly. Jamie presents to you with upper respiratory tract infection symptoms. During the consultation you mention that you also have the results following his sexually transmitted infection (STI) screening appointment last week, but do not actually disclose the results. Jamie informs you he has not had any screening and asks whether you saw his brother last week about this issue. You re-check the notes and confirm that it was Terry you had seen the previous week regarding an STI, not Jamie.

Choose the three most appropriate actions to take in this situation.

- A. Acknowledge your mistake, apologising to Jamie
- B. Inform your supervisor of your mistake
- C. Inform the practice manager of a potential complaint against you from Terry
- D. Contact your Medical Defence Organisation for advice
- E. Suggest to Jamie that the reception staff may have put the test results in the wrong file
- F. Contact Terry to apologise for the error
- G. Confirm to Jamie that Terry had undergone STI screening for which his results are available
- H. Ask the receptionist to arrange an urgent appointment with Terry
