Abiotic Stress Signaling in Plants: Functional Genomic Intervention Girdhar K. Pandey,Manoj Prasad,Amita
Pandey,Maik Boehmer,2016-08-08 Abiotic stresses such as high temperature low temperature drought and salinity limit crop
productivity worldwide Understanding plant responses to these stresses is essential for rational engineering of crop plants In
Arabidopsis the signal transduction pathways for abiotic stresses light several phytohormones and pathogenesis have been
elucidated A significant portion of plant genomes Arabidopsis and rice were mostly studied encodes for proteins involves in
signaling such as receptor sensors kinases phosphatases transcription factors and transporters channels Despite decades of
physiological and molecular effort knowledge pertaining to how plants sense and transduce low and high temperature low
water availability drought water submergence microgravity and salinity signals is still a major question for plant biologist
One major constraint hampering our understanding of these signal transduction processes in plants has been the lack or slow
pace of application of molecular genomic and genetics knowledge in the form of gene function In the post genomic era one of
the major challenges is investigation and understanding of multiple genes and gene families regulating a particular
physiological and developmental aspect of plant life cycle One of the important physiological processes is regulation of stress
response which leads to adaptation or adjustment in response to adverse stimuli With the holistic understanding of the
signaling pathways involving not only one gene family but multiple genes or gene families plant biologist can lay a foundation
for designing and generating future crops which can withstand the higher degree of environmental stresses especially abiotic
stresses which are the major cause of crop loss throughout the world without losing crop yield and productivity Therefore in
this e Book we intend to incorporate the contribution from leading plant biologists to elucidate several aspects of stress
signaling by functional genomics approaches **Bibliography of Agriculture with Subject Index** ,1993-11 **Japanese**
