*Introduction to Payments and Financial Market Infrastructures* Ulrich Bindseil, George Pantelopoulos, 2023-10-28

Payments and financial market infrastructures are vital components of modern economies yet they have often been overlooked by economists. However, any economic exchange including financial market transactions is matched by a payment leg and the safety, efficiency, and immediacy of the payment and the problem of linking the two legs of the transaction delivery vs payment remain universal challenges. The consequences of inefficiencies or interruptions in payment and settlement systems have immediate and significant impacts on the real economy. Moreover, payments and financial market infrastructures are also a matter of strategic importance for nation states and being excessively dependent on foreign providers has been proven to be a significant risk as they can be weaponized. This book provides a concise yet thorough introduction to payments and financial market infrastructures, exploring various types of risks, retail payments, payment systems, cross-border payments, central counterparties, FX operations, and central securities depositories. The final chapter investigates payment innovations including unbacked crypto assets e.g. Bitcoin, stablecoins, and central bank digital currencies. The text outlines key activities and risk management frameworks as well as examining the operational mechanics of different payment systems. The book emphasizes the importance of understanding the nature of transfer of financial claims and liabilities through the process of payment and settlement, providing financial account representations of payments wherever useful. The book concludes that the payment and financial market infrastructure space has been shaken by recent innovations which are expected to lead to seismic shifts in payment technology, practices, and market structures.

Asset Recovery Handbook Jean-Pierre Brun, Anastasia Sotiropoulou, Larissa Gray, Clive Scott, Kevin M. Stephenson, 2021-02-08

Developing countries lose billions each year through bribery misappropriation of funds and other corrupt practices. Much of the proceeds of this corruption find safe haven in the world's financial centers. These criminal flows are a drain on social services and economic development programs contributing to the impoverishment of the world's poorest countries. Many developing countries have already sought to recover stolen assets. A number of successful high profile cases with creative international cooperation has demonstrated that asset recovery is possible. However it is highly complex involving coordination and collaboration with domestic agencies and ministries in multiple jurisdictions as well as the capacity to trace and secure assets and pursue various legal options whether criminal confiscation non conviction based confiscation civil actions or other alternatives. This process can be overwhelming for even the most experienced practitioners. It is exceptionally difficult for those working in the context of failed states widespread corruption or limited resources. With this in mind the Stolen Asset Recovery StAR Initiative has developed and updated this Asset Recovery Handbook. A Guide for Practitioners to assist those grappling with the strategic organizational investigative and legal challenges of recovering stolen assets. A practitioner led project the Handbook provides common approaches to recovering stolen assets located in foreign jurisdictions identifies the challenges that practitioners are likely to encounter and introduces good practices. It includes examples of tools that can be used by practitioners such as sample intelligence reports applications for court orders and mutual legal assistance requests. StAR the Stolen Asset Recovery Initiative is a partnership between the World Bank Group and the United Nations Office on Drugs and Crime that supports international efforts to end safe havens for corrupt funds. StAR works with developing countries and financial centers to prevent the laundering of the proceeds of corruption and to facilitate more systematic and timely return of stolen assets.
