## **Symbolic Power In The World Trade Organization:**

**Symbolic Power in the World Trade Organization** Matthew Eagleton-Pierce, 2013 Questions of power are central to understanding global trade politics and no account of the World Trade Organization WTO can afford to avoid at least an acknowledgment of the concept A closer examination of power can help us to explain why the structures and rules of international commerce take their existing forms how the actions of countries are either enabled or disabled and what distributional outcomes are achieved However within conventional accounts there has been a tendency to either view power according to a single reading namely the direct coercive sense or to overlook the concept entirely focusing instead on liberal cooperation and legalization In this book Matthew Eagleton Pierce shows that each of these approaches betray certain limitations which in turn have cut short or worked against more critical appraisals of power in transnational capitalism To expand the intellectual space the book investigates the complex relationship between power and legitimation by drawing upon Pierre Bourdieu's notion of symbolic power A focus on symbolic power aims to alert scholars to how the construction of certain knowledge claims are fundamental to and entwined within the material struggle for international trade Empirically the argument uncovers and plots the recent strategies adopted by Southern countries in their pursuit of a more equitable trading order By bringing together insights from political economy sociology and law **Symbolic Power in the WTO** not only enlivens and enriches the study of diplomatic practice within a major multilateral institution it also advances the broader understanding of power in world politics

**Uncovering Symbolic Power Power Analysis, Southern Countries, and the World Trade Organization** Matthew Eagleton-Pierce, 2009 **Reconstructing the World Trade Organization for the 21st Century** Kent Jones, 2015-01-02 **Reconstructing the World Trade Organization for the 21st Century** explores the reasons for the WTO's failure to achieve comprehensive multilateral trade liberalization in the new 21st century global economy The solution to the problem must come from institutional reforms that can promote global agreement on achieving the gains from trade

**World Trade Law after Neoliberalism** Andrew Lang, 2013-01-17 The rise of economic liberalism in the latter stages of the 20th century coincided with a fundamental transformation of international economic governance especially through the law of the World Trade Organization In this book Andrew Lang provides a new account of this transformation and considers its enduring implications for international law Against the commonly held idea that neoliberal policy prescriptions were encoded into WTO law Lang argues that the last decades of the 20th century saw a reinvention of the international trade regime and a reconstitution of its internal structures of knowledge In addition the book explores the way that resistance to economic liberalism was expressed and articulated over the same period in other areas of international law most prominently international human rights law It considers the promise and limitations of this form of inter regime contestation arguing that measures to ensure greater collaboration and cooperation between regimes may fail in their objectives if they are not accompanied by a simultaneous destabilization of each regime's structures of knowledge and

characteristic features With that in mind the book contributes to a full and productive contestation of the nature and purpose of global economic governance

**Expert Knowledge in Global Trade** Erin Hannah,James Scott,Silke Trommer,2015-08-27 This book explores tensions in global trade by examining the role of experts in generating disseminating and legitimating knowledge about the possibilities of trade to work for global development To this end contributors assess authoritative claims on knowledge They also consider structural features that uphold trade experts monopoly over knowledge such as expert language and legal and economic expertise The chapters collectively explore the tensions between actors who seek to effect change and those who work to uphold the status quo exacerbate asymmetries and reinforce the dominant narrative of the global trade regime The book addresses the following key overarching research questions Who is considered to be a trade expert and how does one become a knowledge producer in global trade How do experts acquire disseminate and legitimate knowledge What agendas are advanced by expert knowledge How does the discourse generated within trade expertise serve to close off alternative institutional pathways and modes of thinking What potential exists for the emergence of more emancipatory global trade policies from contemporary developments in the field of trade expertise This book will be of great interest to students and scholars of IPE Trade Politics International Relations and International Organizations

**Redesigning the World Trade Organization for the Twenty-first Century** Debra P. Steger,2009-12-15 Two high level commissions the Sutherland report in 2004 and the Warwick Commission report in 2007 addressed the future of the World Trade Organization and made proposals for incremental reform This book goes further it explains why institutional reform of the WTO is needed at this critical juncture in world history and provides innovative practical proposals for modernizing the WTO to enable it to respond to the challenges of the twenty first century Contributors focus on five critical areas transparency decision and rule making procedures internal management structures participation by non governmental organizations and civil society and relationships with regional trade agreements Co published with the International Development Research Centre and the Centre for International Governance Innovation

**Indonesia's Regional and Global Engagement** Moch Faisal Karim,2023-06-16 Karim examines the changes and continuity of Indonesia s foreign policy in the post authoritarian era under presidents Susilo Bambang Yudhoyono and Joko Widodo Indonesia conceptualised and aimed to adopt four principle roles after 2004 being a voice for developing countries being a regional leader being an advocate for democratic and human rights and being a bridge builder These roles however were by no means stable and were constantly being negotiated and contested Karim analyses the contested nature of Indonesian foreign policy and the limits this places on consistency in enacting these roles He highlights two drivers for such limitations conflicting role conceptions and state fragmentation He develops this argument based on four case studies of Indonesia s engagement in human rights governance and trade governance at both regional and global levels Essential reading for students and scholars of Indonesia s foreign policy that will also be of substantial value to those studying policy in
