

LAB: Weather Maps in Motion – North Carolina

QUESTION: How do we interpret current weather maps?

MATERIALS: A computer, Internet access

PROCEDURE: A **weather map** is a map or chart that shows the meteorological conditions over a specific geographic area at a specific time. **Meteorologists** use weather maps to show patterns in the data to aid in **forecasting** the weather.

Zulu Time (Z) is one of several names for the 24-hour time that is used throughout the scientific and military communities. Other names for this time measurement are Universal Time Coordinated (UTC) or Greenwich Mean Time (GMT).

0000Z = 12:00am (midnight)

0600Z = 6:00am

1200Z = 12:00pm (noon)

1800Z = 6:00pm

Zulu Time is the time at the Prime Meridian (0° longitude). **The time in North Carolina is Z minus 5 hours.**

America's Lab Report National Research Council, Division of Behavioral and Social Sciences and Education, Center for Education, Board on Science Education, Committee on High School Laboratories: Role and Vision, 2006-01-20 Laboratory experiences as a part of most U S high school science curricula have been taken for granted for decades but they have rarely been carefully examined. What do they contribute to science learning? What can they contribute to science learning? What is the current status of labs in our nation's high schools as a context for learning science? This book looks at a range of questions about how laboratory experiences fit into U S high schools. What is effective laboratory teaching? What does research tell us about learning in high school science labs? How should student learning in laboratory experiences be assessed? Do all students have access to laboratory experiences? What changes need to be made to improve laboratory experiences for high school students? How can school organization contribute to effective laboratory teaching? With increased attention to the U S education system and student outcomes no part of the high school curriculum should escape scrutiny. This timely book investigates factors that influence a high school laboratory experience looking closely at what currently takes place and what the goals of those experiences are and should be. Science educators, school administrators, policy makers, and parents will all benefit from a better understanding of the need for laboratory experiences to be an integral part of the science curriculum and how that can be accomplished.
