Gowan, 2021-12-14 Have you ever felt ordinary Do you feel as if your life doesn't really count for much Are you feeling defeated because of past or current failures Are you wondering if there even is a God who cares about you and has a plan and a purpose for your life Life can be very discouraging at times and it is easy to slip into an attitude of despair and defeat Looking back over the course of his life author John Gowan came to realize that God did have a plan for his life greater than anything he could have imagined as a child as a teenager or as a young adult Most of us have seasons of life that make it seem as if we are going nowhere It wasn't until he was in his early forties that John even came to have faith in Christ But that

faith has made all the difference in his life and the choices that followed In this book John not only chronicles his faith journey from childhood to adulthood but also shares insights on such topics as the end times and what kind of legacy we should want to leave He will challenge you to think outside the box in his chapter Things to Ponder Many today feel that we are living in very distressing times when not only our individual lives but life in general seems very uncertain It is times like these that make seeking to grow your faith in a loving God even more important What was true for the author is also true for you as you seek to know the one who created you and loves you so much that He sent His only Son to die for you

and Research Tor Halvorsen,Atle Nyhagen,2011-10-18 The university in Europe as a central institution of society is presently met with many new expectations challenging established practices and self understandings of academics across Europe In the European Union the higher education and research system has become a foremost tool of change Current reforms across national higher education systems are seen as a potential for creating a European Higher Education Area as well as an opportunity to introduce EU policies and ideas addressing how reforms can contribute to promote this as an EU dimension An argument that only reforms of the higher education institution in particular the research university as a European institution can make Europe regain its competitive force and economic growth potential has gained currency in the last decade with reference to the US The university system of the US particularly its highly regarded elite universities is also held forth as a model for the developments in the EU and thus for the reforms of the different countries of EU In this book however it is demonstrated that much of the political rhetoric about the construction of the future knowledge economy of Europe and the promotion of a European Higher Education Area may contradict basic values that give Europe its identity as a cultural region Promoting the US university as an ideal model does not do justice to the kind of problems the US is facing in their own reform efforts nor does it reflect properly the social costs of copying such an elite system The book raises a number of issues relating to elitism and democracy internationalisation and regionalisation and new forms of governance in higher education and research which current EU policies seem to neglect **Catalog of Copyright Entries.
