Hot Contention, Cool Abstention Stephanie Dornschneider, 2021 Why did people mobilize for the Arab Spring While existing research has focused on the roles of authoritarian regimes oppositional structures and social grievances in the movement these explanations fail to address differences in the behavior of individuals overlooking the fact that even when millions mobilized for the Arab Spring the majority of the population stayed at home To investigate this puzzle this book traces the reasoning processes by which individuals decided to join the uprisings or to refrain from doing so Drawing from original ethnographic interviews with protestors and non protestors in Egypt and Morocco Dornschneider utilizes qualitative methods and computational modeling to identify the main components of reasoning processes beliefs inferences directed connections between beliefs and decisions Bridging the psychology literature on reasoning and the political science literature on protest this book systematically traces how decisions about participating in the Arab Spring were made It shows that decisions to join the uprisings were hot meaning they were based on positive emotions while decisions to stay at home were cool meaning they were based on safety considerations Hot Contention Cool Abstention adds to the extensive literature on political uprisings offering insights on how and why movements start stall and evolve **Political Disagreement, Violence and Nonviolence** Greg McCreery, 2023-07-10 Violence and Nonviolence descriptively analyzes numerous examples of theorists definitions and characterizations of varying types of violence arguing that a commonsense view of violence and nonviolence is based on paradigm cases that most people generally agree consider as kinds of violence and nonviolence Beyond these cases however McCreery argues that collectives of individuals form into politicized groups that share visions of these types of violence and nonviolence particularly in terms of what they believe to be legitimate kinds of violence and nonviolence in contrast to illegitimate kinds An understanding of violence and nonviolence requires a perspectival relational approach that situates the vulnerable human body as primary Furthermore if nonviolence is to succeed as an effective political strategy then it must work as a kind of violence at least from the perspective of the adversary *Whether to Kill* Stephanie Dornschneider, 2016 Whether to Kill takes a new approach to understanding terrorism By taking first person accounts of those involved in both violent and nonviolent action against the state then analyzing that data via cognitive mapping Stephanie Dornschneider has opened up new perspectives of what drives people to or away from the use of political violence **Psychology of Non-violence and Aggression** V.K.
