## **The God Theory:**

**The God Theory** Bernard Haisch,2006-05-20 An influential astrophysicist and the former scientific editor of Astrophysical Journal proposes a theory that incorporates both scientific and religious world views arguing that God is a scientifically plausible source of consciousness and that God and science can explain each other **The God Theory** Bernard Haisch,2011-05-14 As science integrates the in depth knowledge of the physical world accumulated over the past three centuries it will be channeled into a new and exciting line of inquiry that acknowledges the expanded reality of consciousness as a creative force in the universe and the spiritual creative power embodied in our own minds This book summarizes the thoughts of an inquisitive but open minded scientist What I present here is a theory that looks promising not scientific proof It should not be surprising however if some of what I propose coincides with theories propounded by others who claim a more intimate relationship with the Almighty After all if I am on the right track and if they are it would be worrisome if we were not ultimately in agreement All I ask is that you seriously consider the logic of my theory especially if it challenges you to question what you were taught in Sunday school in catechism or dare I say in physics class I offer this book not as a theological treatise but as a short readable exposition of a worldview that can bring sense and purpose into individual lives and tolerance and peace to a planet whose future is in serious jeopardy in large part because of the irrational dogmatism of both religion and science If I am correct we are literally all one being God in many individual forms Why then would we continue to harm one another **The God Theory: Universes, Zero-Point Fields, and What's Behind It All** ,2012

**The God Theory** Ronald Lewis Tarter,2002-05 We continue to see God through the eyes of ancients who commonly believed that the universe was housed within a small glasslike sphere surrounded by heavenly H2O giving the sky its blue coloration who thought that God daily dispatched angels to push the sun moon and celestial bodies across the sky Today science has taught us that the real universe is virtually unbounded but we still tend to think of God as some quaint old man who dwells forever in the clouds The God Theory interweaves modern science and scriptural reasoning to arrive at a new and much more appropriate view of God and eternity The God who emerges from this analysis bears little overt resemblance to the God of the ancients The God Theory explains His origin existence and nature and His implicit association with the most fundamental units of nature Theology will never again be quite the same **Science and the Theory of God** Xavier L. Suarez,2017-08-26 The supposed tension between religion and science is explored in this book in a most anecdotal and refreshing way From the beginning the author Xavier L Suarez makes no assumptions about the existence of God or the nature of God if he she it exists Instead Suarez engages the reader in an objective discussion of what empirical and social science says about the likelihood of an infinite big banger or first cause who propelled the universe about fourteen billion years ago endowing it with matter space time and order Moving very quickly from astrophysics to history psychology and sociology Suarez looks at the God theory in a most entertaining way Questions like why bad things happen to good people

and whether our species is just a more intelligent edition of animals are tackled in a conversational style that is readable and even fun In the end the author concludes that the God theory is quite consistent with the latest discoveries of science The God Franchise Alan Dawe,2011-12 The God franchise is a book about God and the universe we live in It is also a book about YOU your loves your triumphs your good and not so good actions your fears and your pain You will uncover truths about who you are and the purpose of your life In fact it is a theory of everything Back cover **The (G)od Theory** Sasha

Ravae,2022-08-19 Since birth we have been conditioned to believe that money will make us happy an attractive and successful partner will make us happy a high IQ will make us happy a big house will make us happy a thriving career will make us happy a perfect life will make us happy but this is all a lie Whenever we pursue happiness we are immediately losing touch with the fact that happiness is already here right now in this very moment without us having to do anything or question anything happiness just is With The God Theory there is no script to stick to the only requirement is that you let your light shine through that you be a true manifestation of the Divine s love and not Ego The process of discovering your Inner God is all about turning your power inward instead of outward no longer giving your power away to anything or anyone and acknowledging that the Creator put you here for a very specific reason this takes patience practice and dedication But once achieved everything in life becomes easier because we re now in flow It s all about swimming downstream In the

Beginning Joel Hoffman,2004-08-01 Decodes the long history of Hebrew and its influential place as the ancestor of many modern written languages Hebrew as a language is just over 3 000 years old and the story of its alphabet is unique among the languages of the world Hebrew set the stage for almost every modern alphabet and was arguably the first written language simple enough for everyone not just scribes to learn making it possible to make a written record available to the masses for the first time Written language has existed for so many years since around 3500 BCE that most of us take it for granted But as Hoffman reveals in this entertaining and informative work even the idea that speech can be divided into units called words and that these words can be represented with marks on a page had to be discovered As Hoffman points out almost every modern system of writing descends from Hebrew by studying the history of this language we can learn a good deal about how we express ourselves today Hoffman follows and decodes the adventure that is the history of Hebrew illuminating how the written record has survived the significance of the Dead Sea Scrolls and ancient translations and attempts to determine how the language actually sounded He places these developments into a historical context and shows their continuing impact on the modern world This sweeping history traces Hebrew s development as one of the first languages to make use of vowels Hoffman also covers the dramatic story of the rebirth of Hebrew as a modern spoken language Packed with lively information about language and linguistics and history In the Beginning is essential reading for both newcomers and scholars interested in learning more about Hebrew and languages in general Charles Darwin's

Dr Nyonbeor A Boley Sr The first criterion for accepting a theory as being scientific is that the theory must never contradict empirical facts Charles Darwin's Theory of Evolution Overthrown was written to prove that Darwin's theory of evolution is not in fact a scientific theory at all Absolutely essential to all science is the agreement between theory and experimental facts The opinion that man evolved from molecules contradicts archeological evidence on the origin of the human race Discover for yourself what problems even problems in today's society can be traced back to the promotion of Darwin's theory

Unveiling the Mind of God With The-i-theory A. Z. Khan, 2013-05-30 The most important problem of an individual human being is his or her own existence Self existence always remains as an impenetrable mystery to humankind We are eager to know how we are born in this world as a conscious human being just for once and for a specific time We can assume that the secret of self existence lies under the unknown mechanism of subjective consciousness But who is going to solve the riddle of consciousness What religion used to tell us was naive Traditional science cannot solve this from its rigid aspect of objectiveness Contemporary popular scientists have declared the death of philosophy So we cannot urge those philosopher who supposed to answer this or at least think about this In this situation the I theory shows the light of hope solving the riddle of subjective consciousness The inevitable theory the I theory presented in this book explains the origin of the universe by means of subjective consciousness The theory unveils the secret how you are immortal within a limited time and how you can be born without the help of a God systematically and inevitably At last but not least you can now scientifically discover what is going to happen to you after you die with the help of The I theory

*The God Equation* Michio Kaku, 2021-04-06 1 NEW YORK TIMES BESTSELLER The epic story of the greatest quest in all of science the holy grail of physics that would explain the creation of the universe from renowned theoretical physicist and author of The Future of the Mind and The Future of Humanity When Newton discovered the law of gravity he unified the rules governing the heavens and the Earth Since then physicists have been placing new forces into ever grander theories But perhaps the ultimate challenge is achieving a monumental synthesis of the two remaining theories relativity and the quantum theory This would be the crowning achievement of science a profound merging of all the forces of nature into one beautiful magnificent equation to unlock the deepest mysteries in science What happened before the Big Bang What lies on the other side of a black hole Are there other universes and dimensions Is time travel possible Why are we here Kaku also explains the intense controversy swirling around this theory with Nobel laureates taking opposite sides on this vital question It is a captivating gripping story what's at stake is nothing less than our conception of the universe Written with Kaku's trademark enthusiasm and clarity this epic and engaging journey is the story of The God Equation

Exploding the Big Bang Theory Joseph Donnelly, 2015-08-14 The essence of this my third effort at publication now stands to be the true basis of our human species new working philosophy My main interest is

of our relationship with God on all fronts Simple when realised we under the split headings of humanity in tribe clan national or of different skin colour configurations have amassed over 10 000 religious philosophies to meet our personal needs Of which none seem to work for all over the limit of tribe clan national or colour configuration Because of the very modern sophisticated trend of rejecting God generally understood to have been the creator and in using the guessed at elements of how science really works or had been given credit for how it must work Many in that field of study have felt qualified enough to snub those 10 000 religions by stating there never is or was God in any case My personal stand and standards revolve around humanity in us getting the understanding of God right in the first place but slightly askew in the opinion we were expressly chosen by God to promote enlightenment upon the universe Yes we got it right there is God and no arguments can be valid against this acceptance To endorse that statement I have been able and commit my to be our understanding of how and why God set the clock of creation from the beginning of all time now scientifically proved by us through the open discovery of the God particle much more than a scientific phenomena Part of my style and method stands to the terms of all religions in best choice to be monotheistic by character This fits with the full progress of all histories naturally connecting with the future of self Self to be the individuals we each are but hailed to be of species over tribe clan colour or national Our monotheistic relationship stands also to self in that however we are in style by colour or creed We will meet to be the same image of God as seen in self but only able to manage that wonderful spectacle on Gods terms from our solid belief in God reality and our future See what you think when from now you can also evaluate the latest of sciences exposé over and above some of the scientific ranting of how any form of intelligent life began but more importantly why remembering we are here on Gods terms not ours
